The Anixter Difference

Anixter supplies high-volume, low-cost components and customized Supply Chain Solutions to leading OEMs (original equipment manufacturers) around the world. By managing the supply chain, we allow our customers to streamline their manufacturing processes, reduce overall costs and focus their core competencies on the production of world-class products.

By using our IT and global sourcing expertise, we can tailor each solution to meet our customers' exact needs. Our in-house teams use advanced quality procedures to manage each solution for successful implementation.

Anixter's Fastener division employs approximately 1,900 people and distributes more than 14 billion components annually, operating from 70 global locations across North America, Europe and Asia Pacific.

Principal Services

- Spot buy and forward scheduling
- Direct line feed and third-party management
- Kitting and subassembly
- Global parts database
- Quality assurance
- Aftermarket spares and subcontractor supply service
- Technical support
- Engineering support
- Global quality management system

Customers Served

- Agricultural
- Automotive
- Construction and mining equipment
- Defense
- Electrical and electronic equipment
- Food
- Furniture
- Healthcare
- Heating, ventilation and air conditioning
- Lawn and garden
- Marine
- Metal fabrication
- Materials handling
- Power generation
- Powertrain
- Pumps and valves
- Rail
- Recreational vehicles
- Renewable energy
- Tunnel construction
- Utilities
- White goods

Our Services

Spot Buy and Forward Scheduling

For customers who require a standard supply solution, Anixter's customer service centers in North America, Europe and Asia Pacific offer a truly local service. Whether ordering by phone, fax or e-mail, customers can rest assured that their local Anixter contact will process spot buys or forward scheduling requirements promptly and efficiently.

Direct Line Feed (DLF) and Third-Party Management

The DLF service allows customers to completely outsource their material management functions, from receipt and inspection to stock control at point of use. The benefits of DLF include reduced inventory, increased working space and reduced overhead. Anixter also offers management of third-party supply service, creating additional cost benefits through supplier reduction.

Kitting and Subassembly

By working closely with customers to understand their production needs, Anixter sources the individual components for the finished unit as required. These parts can be packaged to your specifications, or the finished unit can be assembled by trained professionals at the local Anixter customer service center. In addition to a reduction in inventory, these services can provide significant benefits through reduced labor costs and increased working space.

Aftermarket Spares and Subcontractor Supply Service

When OEMs redesign and upgrade their products, the need for additional components expands. At the same time, after-sales and spare parts increase in order to support legacy products. With this in mind, Anixter offers a full aftermarket spares service, in which approved parts are prepared and packaged as required for the end-user. As an extension to this, Anixter also offers a subcontractor supply service, in which approved parts are supplied to the customer's subcontractors as needed.

Technical Support

By using a team of in-house application engineers, Anixter provides a wide range of technical services, from design support and part rationalization to problem resolution and complete process re-engineering. This can lead to significant benefits through reduction in part costs and an increase in manufacturing process efficiency.

Product Portfolio

Our product portfolio contains more than 225,000 product lines. We are continually adding new parts to meet our customers' requirements.

- Abrasives
- Adhesives
- Ball joints
- Bolts
- Brackets
- Bushes
- Building fixings
- Cable ties
- Castings
- Circlips
- Cutting tools and fluids
- Drivers
- "E" clips
- Electrical products
- Fittings
- Gaskets
- Hand tools
- Helicoils
- Hinges
- Hose clips
- Hydraulic seals
- Janitorial and PPE
- Keys
- Latches
- Maintenance products
- Metal bonded rubber
- Metal clips
- Nipples
- Nuts
- "O" rings
- Pins
- Pipe clips
- Pipe fittings
- Pipe plugs
- Plain bearings
- Pneumatic seals
