**The Right Solutions
 Where and When
 You Need Them.**

Save Time

Reduce Risk

Increase Efficiency

Mitigate Costs

The Anixter Difference

Our core strength lies in not only providing the right products you need now, but also in providing you with the technology and knowledge you need to meet your security challenges in the future. With a national network of security specialists, we help you manage the complexity of your security installation with a comprehensive portfolio of analog, hybrid and IP-based solutions.

We have a variety of resources dedicated to keeping our customers current on the latest products, applications, standards and emerging technologies:

- Infrastructure Solutions LabSM with end-to-end testing, compatibility testing and performance reports
- Technical experts with complete knowledge of systems and standards for surveillance and access control
- Educational training and seminars

Products for Every Solution

Developing the right security solution is about understanding the products and technologies involved and how they can drive innovation, create efficiencies and transform applications. From stand-alone products to fully integrated IP solutions, we have the right offering to cover your security needs regardless of the scope of work.

- Video surveillance
- Access control
- Door-locking hardware
- Architectural hardware
- Key systems and control
- Sound and mass notification
- Electrical and electronic wire and cable
- Industrial communications
- Networking, wireless and voice electronics
- Network cabling (copper and fiber)

Supply Chain Solutions for Security

Our global network of security experts are backed by local supply chain experts to create an effective deployment path, which includes assessments, procurement assistance, financial support and Web-based ordering integration. We have distribution centers all over the world so you can receive the products and technologies you need to stay ahead of schedule.

- READY!SM Deployment Services
- eBusiness solutions
- Kitting services
- Value-added services

READY!SM Deployment Services by Anixter map our distribution and supply chain solutions to the construction or deployment process of any technology project. We combine sourcing, inventory management, kitting, labeling, packaging and deployment services to simplify and address the material management challenges at the job site(s). READY! Deployment Services by Anixter will help deliver your product specifications as planned.

From enterprise data centers to security infrastructure to in-building wireless and beyond, we recommend and provide solutions that connect the world's most important information. Delivered directly and through partners, these solutions help today's data-intensive organizations operate more efficiently and maximize the business value of their infrastructures. As a provider of leading-edge solutions, we recognize the benefits that a joint technology partnership can bring to its customers. That's why we created the Technology Alliance Partner program with the mission of building long-term partnerships that enable us to deliver comprehensive and proven best-of-breed technology solutions.

Video Surveillance

Network Cameras

- Arecont
