The Anixter Advantage

Anixter continuously identifies and implements solutions to reduce customers' complexity and diminish costs associated with high volumes of low-cost, mission-critical parts. With more than 14 billion components (from nuts and bolts to customized solutions) supplied every year to thousands of customers, our diverse best-in-class product range and global supplier network can work with you to find products and services within your budget. Our global supply chain solutions enable you to reduce total cost of ownership with programs and meet aggressive timelines.

Anixter is committed to:

- Establishing a local supply base in Fresno to support both our customers' and suppliers' supply chain needs
- Helping customers achieve the total lowest cost of acquisition in Fresno through localization of the supply chain
- Providing the infrastructure to support suppliers with a local presence
- Building a local team to provide dedicated in-town service and technical assistance
- Dedicating local inventory to mitigate risk for suppliers and customers
- Profitably delivering the highest level of service, technical expertise and quality to customers on a global basis.

Valued Partnerships

With a variety of services including direct line feed, kitting and vendor-managed inventory, we enable customers to recover some of their production costs and improve their performance.

11 ACCREDITED QUALITY LABS WORLDWIDE

Global Reach, Local Presence

With more than 40 percent of our top customers working in multiple geographies, Anixter helps OEMs manage the complex nature of importing, trading and working with local suppliers of goods and services. With a greater focus on local products, companies need to work with a partner to procure these goods and services on their behalf. By expanding our current presence in the local market, we can leverage our operations and supplier relationships in California to serve local and Central California customers.

150+ TECHNICAL EXPERTS
