

LANmark™-SST : High-Density Cat 6A Performance

Berk-Tek | a **LEVITON**
company

Protecting your IP traffic is as easy as 1 2 3

1 Superior Heat and Signal Performance

Insulated metallic isolation wrap provides superior heat management and noise-cancelling performance, protecting your IP traffic from outside interference. Tri-layer foil-tape construction prevents electrical energy from along the shield, so no grounding is required.

2 Reduced Diameter

Smaller diameter (0.25" CMP, 0.275 CMR) provides improved flexibility, optimized cable management, and significant tray-fill ratio improvement for high-density applications.

3 Premium Jackets

Leviton uses only premium jacketing compounds to ensure your IP traffic is protected from the stress and strain of installation in the real world.
