

Network Channel Extenders

EXT-100

A lower-cost alternative to extend PoE+ (30 Watts) and 100 Mbps to 385 meters.

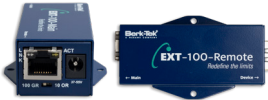

OneReach™

Utilizes a copper/fiber cable to extend PoE+ (30 Watts) and 1 Gbps to a kilometer or more.

TAKE YOUR NETWORK ANYWHERE

Applications like building automation and security often require devices to be located more than 100 meters from the switch – in parking lots, parking garages, and at various other places inside and outside the building. Leviton’s network channel extenders offer high-performance solutions to connect and power any application in virtually any environment.
