

CommScope® Fiber Distribution Cables Global Communication

CommScope announces a manufacturing change of fiber distribution cables. All fiber distribution cables manufactured after July 1st, 2015 will feature a single colored buffer tube specific to glass type.

- Multimode LazrSPEED® 150, 300, & 550 will have Aqua buffer tubes
- Multimode OptiSPEED® 62.5 will have Orange buffer tubes
- Singlemode TeraSPEED® will have Yellow buffer tubes
- Indoor/Outdoor Fiber Cable will have Black buffer tubes

A print string will be updated for buffer tube identification as shown below:

Generic Print String:

{FLAME RATING} {SUBUNIT #} – {FIBER TYPE} - {SERIAL NUMBER} XXXXX

{FLAME RATING} is determined from the first letter of the description
Flame Ratings: R=Riser; P=Plenum; Z=LSZH Riser; N=LSZH Riser

{SUBUNIT #} will be between 1 and 12, depending on how many subunits are in the cable

{FIBER TYPE} will include one of the following, unless it is a composite tube, in which we will include both fiber types. Singlemode always comes first, followed by 62.5um or 50um.

TYPE 5K OM4	TYPE 5L OM3	TYPE 5M OM2
TYPE 6F OM1	TYPE 8W SM	TYPE 8G SM

EXAMPLE: PLENUM SUBUNIT #1 – TYPE 5K OM4 – 131252151001 00000

Affected Products:

See Table A for Fiber Distribution Cable Affected by this Change.

See Table B for Pre-Terminated Distribution Cable Assemblies Affected by this Change.

Table A: Fiber distribution cables affected by this change:
