

## Fiber Traffic Access Point (TAP) Solution

CommScope is announcing the SYSTIMAX® InstaPATCH® 360 TAP modules and array fanout cables. When used in conjunction with monitoring equipment from third parties, the fiber TAP module and fanout cables enable users to:

- Gain real-time visibility on network traffic at physical layer of fiber infrastructure
- Implement undetectable, zero packet drop and no latency network traffic monitoring
- Support IT mission critical application performance management and network security on 1/10 Gigabit Ethernet and 4/8/16G Fibre Channel Storage Area Networks

### Ordering Information:

The multimode TAP modules will be available for ordering in May 2014 and single-mode TAP modules will be available in June 2014. Please visit Product Catalog at the link provided.
