

InstaPATCH® QUATTRO Panel Enabled with iPatch®

CommScope® introduces the InstaPATCH QUATTRO pre-terminated copper solution enabled with iPatch. It combines high-performance with plug and-play simplicity for fast data center deployment and easy modification as your network needs evolve. With the addition of

an iPatch kit to the InstaPATCH QUATTRO copper panel, you can bring vision, knowledge and control into your network environment. This solution is orderable as of May 10, 2014.

InstaPATCH QUATTRO supports Category 6A and Category 6 U/UTP solutions and has four standard components: trunk cables, breakouts, 4-port modules and panels. It also features:

- Real-time tracking of changes to physical layer connections
- Port level push button tracing with LED visual identification
- No downtime upgrade kits for use with previously deployed “iPatch Ready” SYSTIMAX InstaPATCH QUATTRO panels
