

SYSTIMAX® QSFP LSZH Configurable Fanout

CommScope® announces the fully configurable QSFP Array Fanout Patch Cord. The new versions have configurable Material IDs (MIDs) and will replace the existing MIDs that have fixed or hard coded “760” Material IDs.

The 8 fiber QSFPs will be available in low smoke, zero halogen (LSZH) and have a 24-inch or a 48-inch fanout to meet your patching needs. Table 1, below, lists the new configurable offerings while Table 2 lists the products that will be deactivated.

Ordering Information:
