

# SYSTIMAX® Universal 1100 PS PowerSUM Panel

CommScope introduces the SYSTIMAX 1100-U-PS PowerSUM panel to replace the current 1100-PS PowerSUM panel.

The SYSTIMAX 1100-U-PS panels are priced the same as the previous 1100-PS panel versions and are available to order from September 1<sup>st</sup> 2014.

CommScope universal panels include the SYSTIMAX 1100-U-PS, and now have the following common features:

- A new, robust cable management bar. The cable management bar is attached to the panel frame and enables the tie-down of cables without bending or yielding to the weight of the cables.
- Termination managers for consistent and reliable cable terminations. Cable conductors are placed into the termination manager. The termination manager then snaps and locks into place while aligning the cable conductors with the correct IDC termination slots.
- A new label holder that retains the paper label strips in place and accepts color coded icons for port color code identification. The panels are shipped with these label holders and label strips.

Compatible label sheets are available for either laser or ink jet printing. A downloadable label template is available in excel format to populate and print the label sheets.

Material ID	Product Description
760183244	360 and UNP Label Sheet US LTR
760186502	360 and UNP Label Sheet US A4

Excel format labeling templates for these label sheets are available at the following link:

<http://www.commscope.com/Resources/Labeling-Templates/>

(Each template is identified by Label Sheet MID/Description)
