

CleanAdvantage™ Technology

CleanAdvantage™ Technology

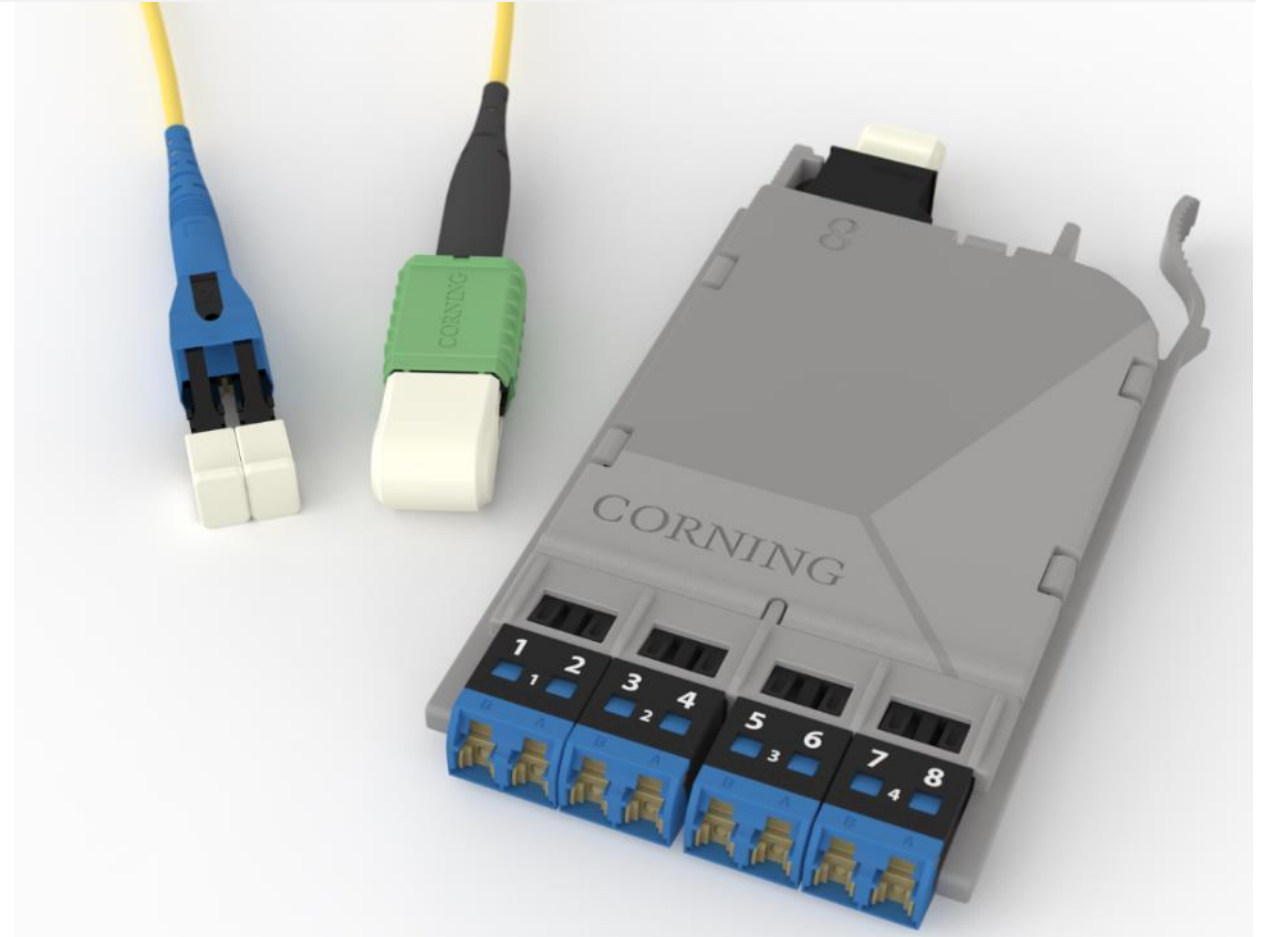

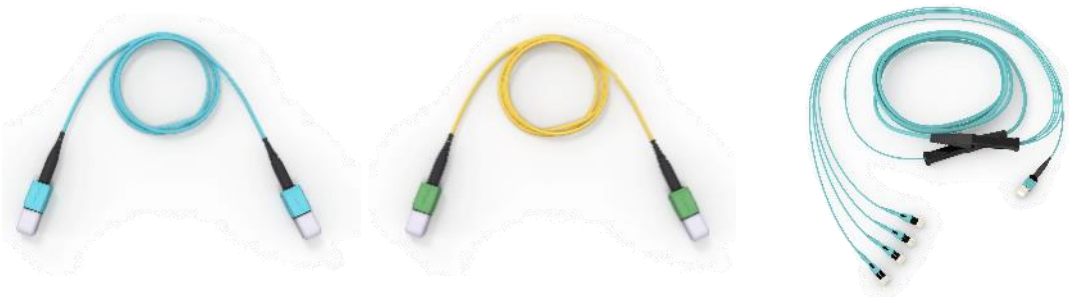

Are there any alternatives?

Meet Corning® CleanAdvantage™ Technology

Corning's proprietary technology implemented at the factory cleans the entire ferrule.

Optimized dust cap design, engineered to maintain a clean end face until its first mating connection.

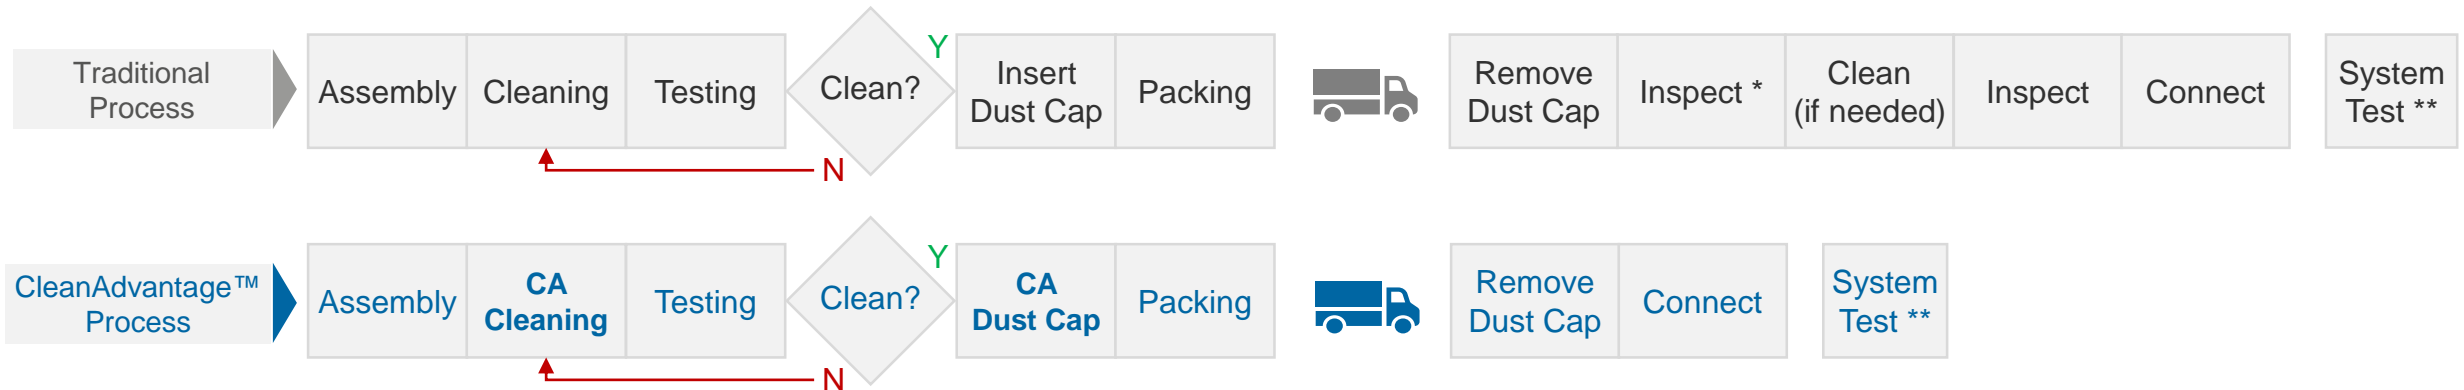

CleanAdvantage™ Technology

New cleaning technology implemented at the factory.

At the Factory

In the Field

Reduces installation time in the first mating connection.

CleanAdvantage™

Generates savings for reduced use of cleaning consumables.

*Some installers skip this first inspection.

**Cleaning of test jumpers is required before testing. Cleaning after a fail system test should be performed.

CleanAdvantage™ Technology

How does the CleanAdvantage™ process work?

Cleaning is important and Corning does it for you!

- ✓ Corning cleans the connector at the factory for you.
- ✓ No scoping or cleaning in the field is needed before the first mating connection.
- ✓ Corning's proprietary technology enables a focused and directed cleaning of the end face, cleaning the entire ferrule.

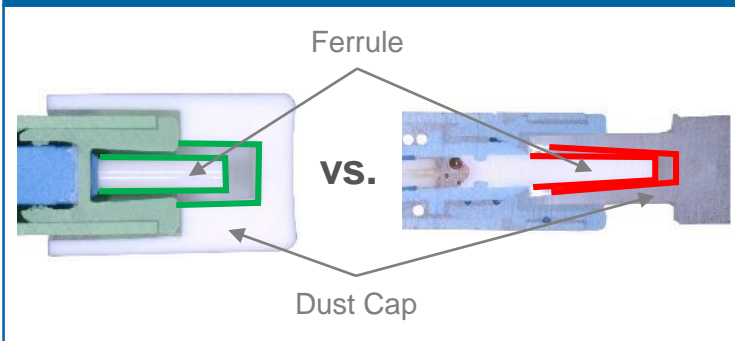

CleanAdvantage™ Technology

How do CleanAdvantage™ dust caps work?

Sealed dust cap with optimized design

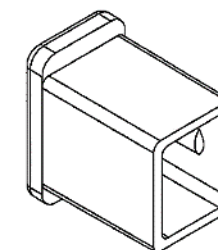

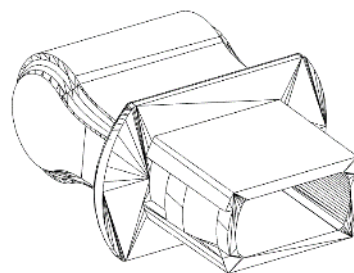

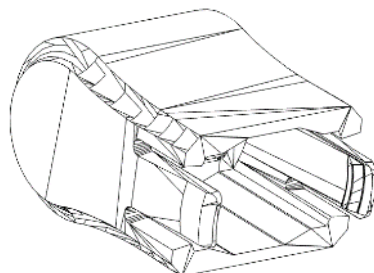

No off-gas materials plus static control of the dust caps

Available for MTP, LC Uniboot, and EDGE™/EDGE8® Modules

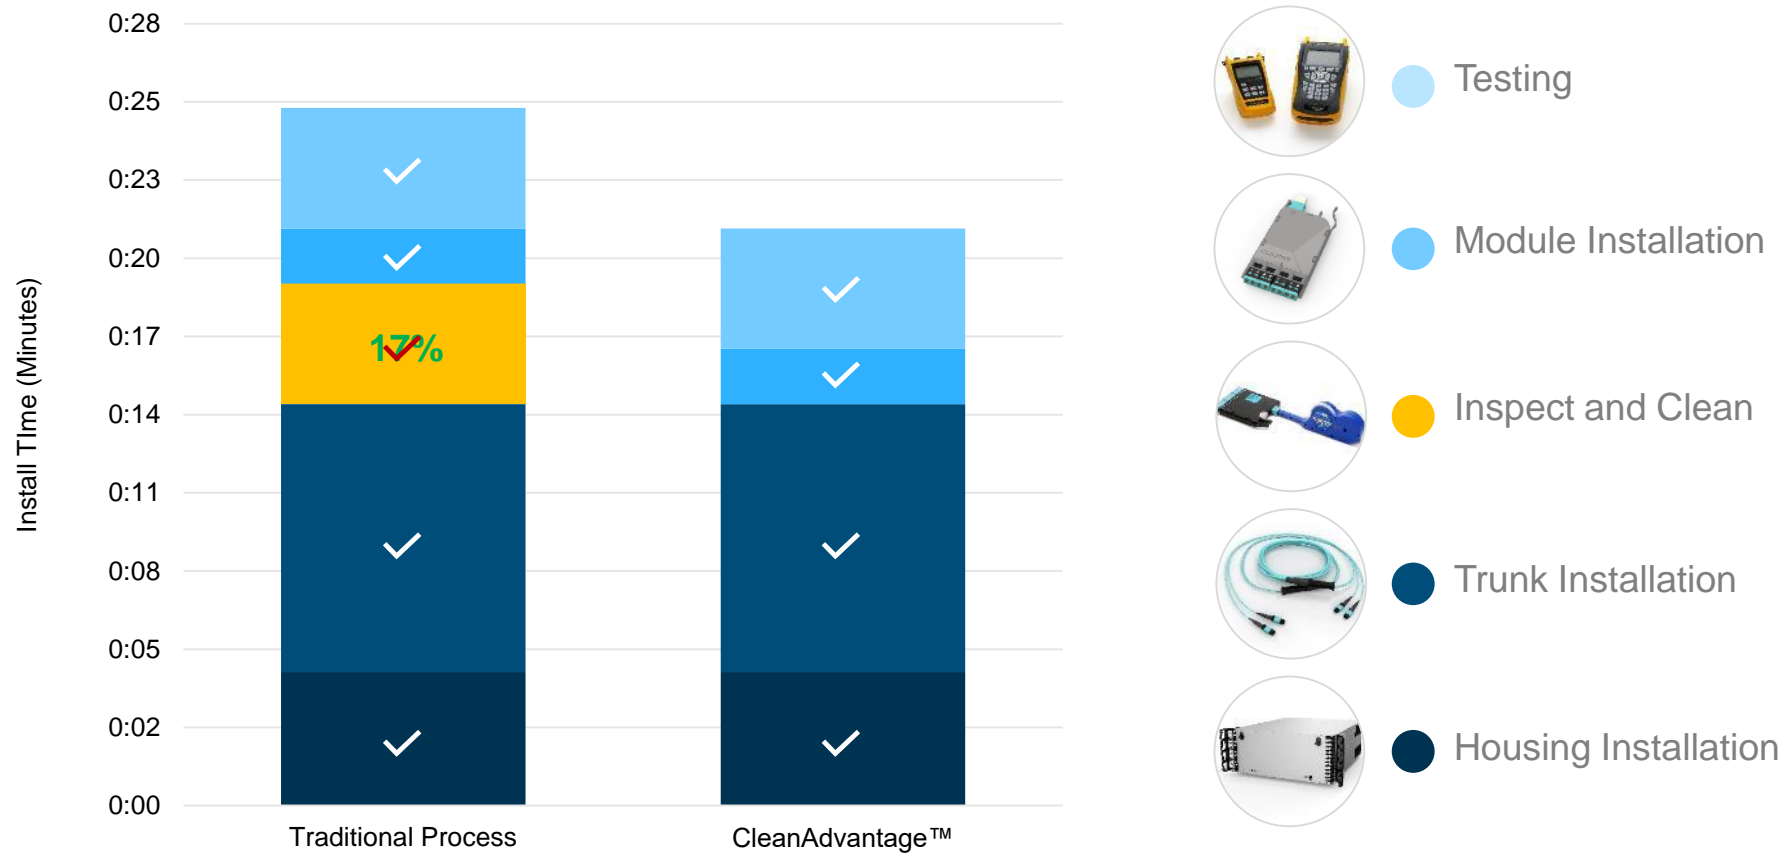

White Dust Cap = CleanAdvantage™

CleanAdvantage™ Technology

CleanAdvantage™ reduces installation time by up to **17 percent** by eliminating initial scoping and cleaning of connectors.

CleanAdvantage™ Technology

Installers can save up to **95 percent** in consumables by implementing CleanAdvantage technology.

Test patch cord

CleanAdvantage components

Cost of consumables

Cost of port cleaner

Clicks per port cleaner

Cost per click

Cost per click

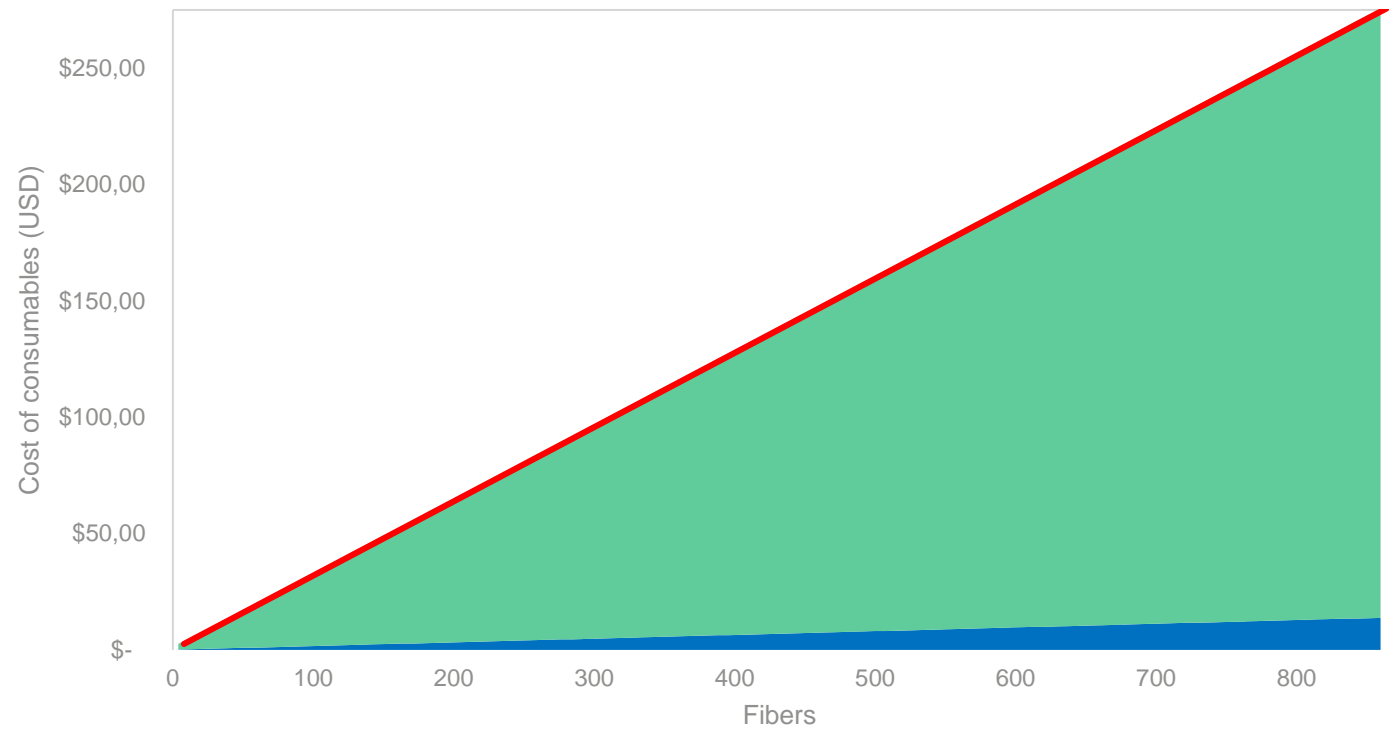

Clicks to clean the end face

Cost of consumables of **one mating**

Cost Savings with CleanAdvantage Technology

Cost with CleanAdvantage™ technology

Cost without CleanAdvantage™ technology

Availability

Global launch with a regional manufacturing roll-out

Americas
mid-February
manufacturing

EMEA
mid-April
manufacturing

APAC
mid-April
manufacturing

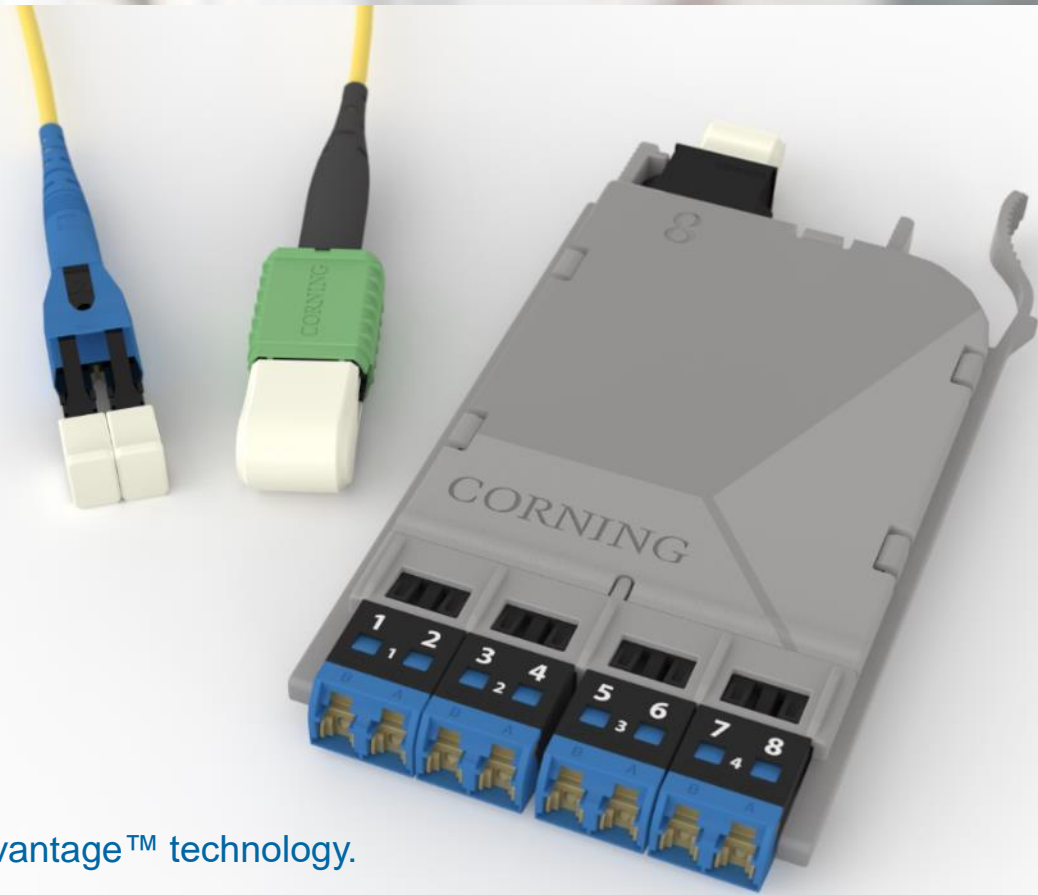

Inventory

Deplete current inventory of
EDGE/EDGE8 components

Distribution

Ongoing communication with distribution
and first-in, first-out

Please stay in touch with Corning to receive updates about the availability of CleanAdvantage™ technology.

Value Prop

CleanAdvantage™ – Corning takes care of the cleaning process for you!

Up to 17%
reduction in time
to install

Reduce installation time up to 17% by eliminating initial scoping and cleaning of connectors.

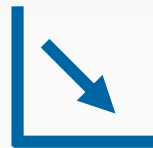

Standardized offering **EDGE™**
EDGE8®

Standardized across EDGE and EDGE8 Solutions without price premiums.

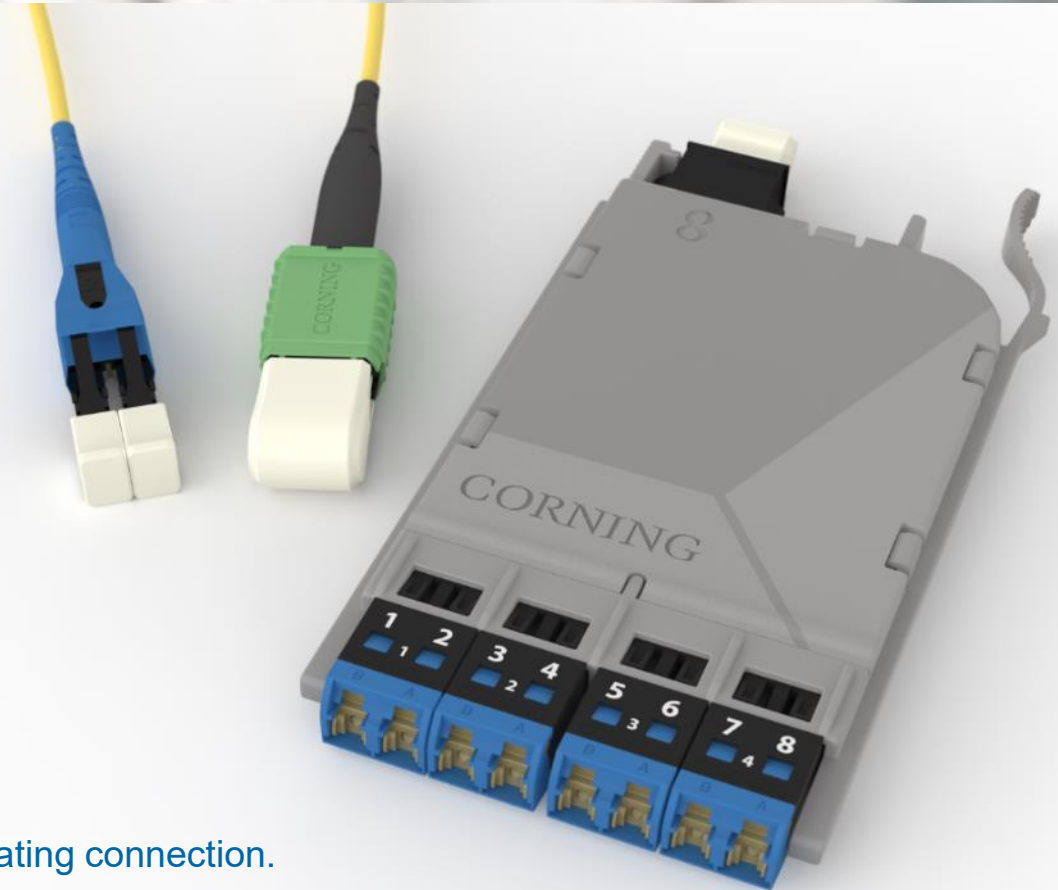

Up to 95%
savings in
consumables

Decrease consumables cost up to 95% due to factory cleaning technology.

Minimizes
debris transfer

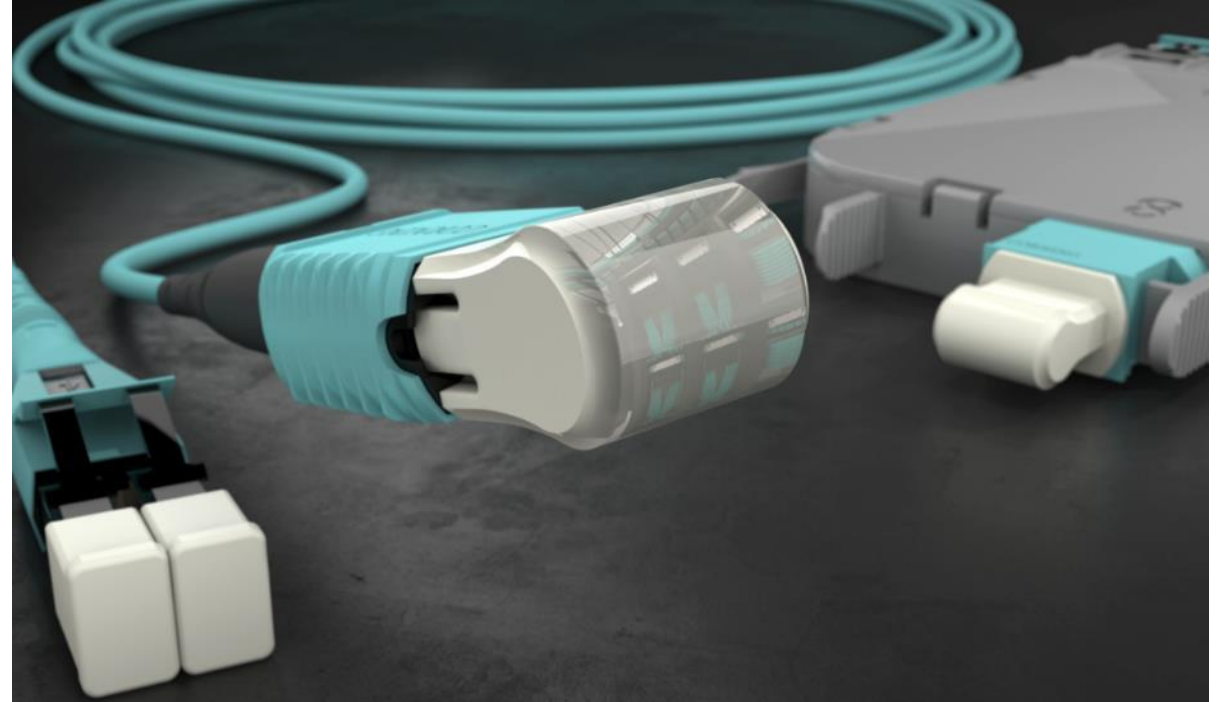

Reduces the risk of debris transfer on the end-face, minimizes signal degradation.

CleanAdvantage™ technology eliminates the need for you to clean prior to the first mating connection.
