

Great Lakes

CUSTOM CAPABILITIES

PRODUCT PROFILE...

This custom configuration is based on Great Lakes Case & Cabinet Co., Inc.'s 300 E series enclosure.

In this custom configuration, the enclosure is used to contain DVR (digital video recording) and CCTV (closed circuit television) equipment for a customer who has a large number of offices located throughout the country. At each location this enclosure is located in the manager's office, which, in most cases is quite small. The laminate top on this "manager's cabinet," stands desk height (at 30" tall) is designed to create additional work surface for the location manager within his/her office.

In addition to the DVR and CCTV equipment the customer also installs a monitor and keyboard into each enclosure to create an "AV Cart" for each location.

For more information, on this custom application, please contact technical sales at 1-866-TRY-GLCC (879-4522).
