

KT-Standalone

Multiple Benefits. Security Simplified.

Key Features

- Configure and manage doors using a simple embedded web browser
- Web-based access control – No software to purchase and install
- Intuitive configuration wizard for quick set up
- Compatible with KT-1, KT-2 and KT-400 controllers
- End-to-end encryption for added security with Kantech ioSmart readers and smart cards

Standalone Mode

Full-fledged security management can be daunting for small businesses, but KT-Standalone removes the complexity from that process by giving users a web-based system that ups the ante on security, while bypassing the investment required for computers and software.

Featured within Kantech's KT-1,KT-2 and KT-400 door controllers, Standalone Mode* allows for smaller access control systems of up to four doors to be controlled and managed using embedded and intuitive web-based software – no additional EntraPass security management software required.

Using a web browser, customers can configure and manage their security anywhere and at any time, via a desktop computer or a mobile device. With no dedicated software or PC hardware to purchase and maintain, Standalone Mode provides an economical choice for small businesses with basic access control needs, such as assigning card access and running reports.

High Level of Security

Used in conjunction with Kantech's ioSmart smart card readers and cards, KT-Standalone controllers provide highly secure encryption measures. ioSmart readers deliver end-to-end AES 128-bit encryption between the ioSmart card and reader when connected to KT-1, KT-2 and KT-400 controllers over RS-485.

*Standalone Mode parameters vary by controller, please see controller specific Data Sheets for details.

The power behind **your mission**

Web-based Software

Highly intuitive and responsive web-based software enables you to manage your door security from anywhere, using a desktop or mobile device.

Plug & Play

Simply power up the Kantech controller; connect to a web browser; follow the quick setup configuration wizard and your door security is up and running in minutes.

No Training/ Certification

As KT-1, KT-2 and KT-400 hardware and Standalone Mode set-up is highly intuitive, no dealer training or certification is required.

Cost-effective

KT-Standalone combines hardware and software offering a complete, cost-effective, and simplified web-based access control solution.

About Johnson Controls

Johnson Controls is a global diversified technology and multi-industrial leader serving a wide range of customers in more than 150 countries. Our 120,000 employees create intelligent buildings, efficient energy solutions, integrated infrastructure and next generation transportation systems that work seamlessly together to deliver on the promise of smart cities and communities. Our commitment to sustainability dates back to our roots in 1885, with the invention of the first electric room thermostat.
