

## RapidRun HDMI Decorative Wall Plate Receiver

Extend 4K HDMI video and audio signal up to 1000ft to a decorative wall plate receiver

### Product Features

- Install an HDMI wall plate extension in existing A/V infrastructure
- Supports full 4K (2160p), 3D, and all other HDMI high speed features
- Utilizes fiber cabling, so it is resistant to EMI/RFI interference
- Convenient Micro USB Female port for required power source

### Application Setup

RapidRun Optical is designed to be the standard for in-wall HDMI audio/video installations. Install the HDMI receiver wall plate and get HDMI audio and video signal up to 1000ft with full 4K 4096x2160 resolution from a transmitting source through an Optical runner cable to allow for a clean termination.

RapidRun Optical's resume makes it the ultimate HDMI, easy to deploy in any install. It supports 4K UHD (2160p) at 60Hz or lower resolutions with a 4:4:4 Chroma sampling, a color bit depth of 8bits per color at 60Hz and HDCP 2.2. This more simply states that it is capable of everything that a high-speed 6ft HDMI cable can do but can send the signal up to 1000ft.

## Simplify Connectivity

Installing HDMI in wall—especially at extended range—requires special cabling, or active device boxes that require external power, and in many cases conduit. The RapidRun HDMI wall plate receiver can be installed in a new or existing A/V gang box giving it a clean and professional appearance. The included USB cable must be used for supplying power, utilizing either a USB AC adapter to an available wall outlet, or an available USB port on the display.

## Package Contents

- RapidRun HDMI Decorative Wall Plate Receiver
- USB Power Cable
- User's Manual

Item #	Description
