

LinkRunner AT Network Auto-Tester

The NETSCOUT® LinkRunner™ AT Network Auto-Tester provides quick and complete copper and fiber-optic network connectivity testing. This rugged, handheld network tester speeds troubleshooting and reporting with a complete one-button AutoTest and zero-touch Link-Live cloud reporting. The AutoTest performs the most common set of connectivity tests in 10 seconds, enabling you to quickly and accurately identify and solve network connectivity problems. Cloud reporting automatically uploads results to the Link-Live Cloud Service for project management and reporting.

LinkRunner AT Key Features:

- Verify connectivity at 10/100/1000 over copper or 100/1000 over fiber
- Switch, Port, VLAN instantly identified
- Supports both IPv4/IPv6 networks
- TruePower™ PoE load testing

“I was amazed... this device was finished testing before I could even explain to one of my junior engineers what I was actually doing. I’ve been an engineer for more than 20 years and this device just gets me, it understands what my workflow truly is and what type of information I need to do my job.”

Charles Morris, senior consultant at ACS, A Xerox Company
