

WE ARE LEGRAND®

When you choose Legrand, the world leader in electrical and digital infrastructure for the data centre and building industry, you put our powerful worldwide presence — a guarantee of global expertise—to work for you. And you're sure to find the solutions you need among our innovative applications in new business segments.

Choose from our huge selection of innovative designs to build solutions and configure systems that make the most of the latest breakthroughs in technology.

Cablofil steel wire cable tray can be used in a range of overhead and underfloor installations to route cables in your data centre or office environment. Cablofil provides the highest quality cable management, together with our Swifts and Salamandre ladder, tray and trunking ranges.

Zucchini has become a leading name in busbar power distribution systems and cast resin transformers. With one of the most comprehensive ranges on the market, Zucchini offers solutions from 25 A lighting busbar through to 6300 A high power systems, including rising mains. The latest addition to the range – an IP68 rated bar – comes with the added benefit of excellent fire resistance which offers continuity of service in areas requiring critical power.

Zucchini's cast resin transformers are used in a vast range of applications and represent the most reliable answer for distribution systems, power production, rectification, traction and special requirements.
