# Trulifi starter kit

Upgrade your meeting room with the fastest and most stable internet connection!

Do you want to upgrade your meeting room or create a LiFi zone with the most innovative internet connection? Or simply try it to experience what LiFi can do for you?

You can have your meeting room installed with LiFi in no time. You can install it yourself, it's that easy, or we'll do it for you. All you need for the installation comes in one box, it will connect to your existing network, and be installed alongside your existing lighting. No hassle, only the best internet connection from now on. And at surprisingly low costs.

## What's in the box?

**Access point**  
1 Piece

**Transceivers**  
6 Pieces

**Access keys**  
6 Pieces

- All necessary power and cables, just connect directly to your LAN network
- All installation guides and user manuals
- 6 ceilingholders for quick installation in existing ceiling

We offer installation services in most countries, please contact your local representative.

## Trulifi Hotspot: a high-performance place I trust

With a Trulifi hotspot a general office environment is upgraded to an easy to use and highly reliable performance network. Trulifi is immune to radio signal interference and ideal in places where many networks overlap, like in an office. So no momentarily glitches anymore during that important meeting.

Trulifi adds an extra layer of physical security as light waves can't penetrate walls. On top of that Trulifi has AES 128-bit encryption. This all helps to make Trulifi as secure and stable as a cable.

## Enjoy the benefit of LiFi technology

- A reliable signal, ideal for video conferencing and accessing cloud applications
- Secure, the signal stays inside the meeting room, no eavesdropping
- Fast, speed up to 150 Mbps\*
- Full coverage with seamless handover for areas up to 20m<sup>2</sup>\*
- Plug & play solution
- The Trulifi starter kit has all you need to upgrade your room in a matter of hours

\* We have a portfolio of LiFi solutions to also equip areas up to 300m<sup>2</sup> with speeds up to 200 Mbps.

## Ready to create your own high-performance zone you can rely on?
