SWITCH READY SIEMENS ZONE BOX

The Switch Ready Siemens Zone Box is an enclosure for communications equipment using industrial-rated components. It is designed to protect all your industrial and mission-critical communications equipment from dust, liquid, tampering and harsh environments. Anixter's technology experts can customize a Siemens solution that allows for future expansion and results in significantly faster deployment time.

| 3 Wire Management | 7 UPS | 10 Surge Protector | 14 Power On Indicator |
| 4 Ethernet Switch | | 11 Line Filter | |

ACCESSORIES

- Ground Bar
- Terminal Block
- Device Labeling

SOLUTIONS Linecard | SWITCH READY SIEMENS ZONE BOX

Features:

- UL Listed
- Meets UL 508A Standard
- NEMA Rated to the environment
- Surge protection
- RFI filtration
- Surge fault pilot device
- Selectivity module, provides 4 independent circuits with short circuit protection and selectable current overload protection
- DIN rail design allows for reconfiguration
- 48VDC or 24VDC power supply
- Industrial UPS
- Lockable enclosure
- Available in two sizes

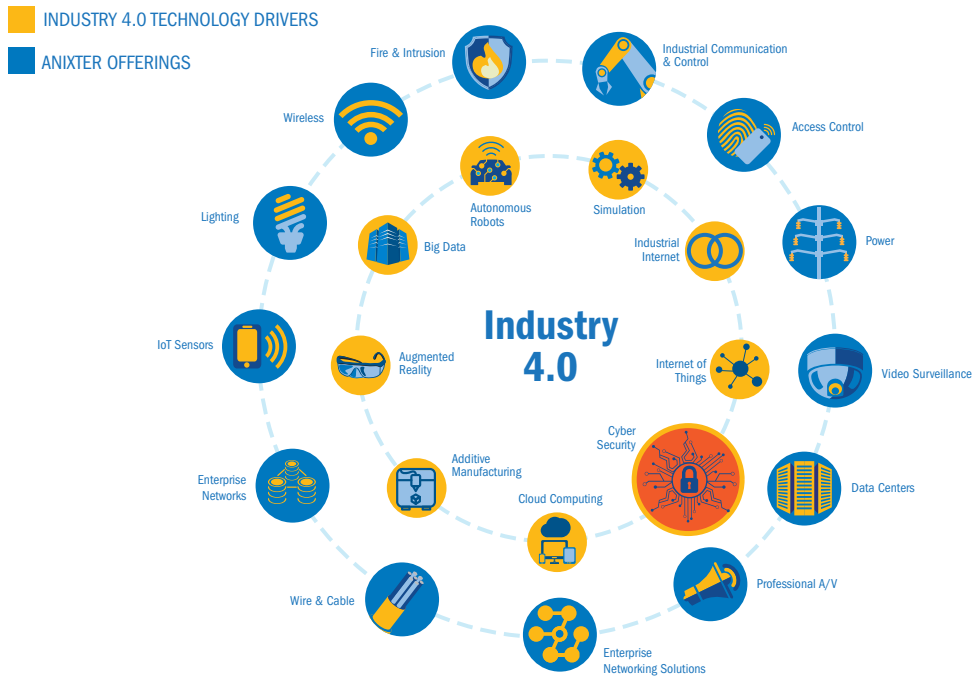

Benefits:

- Single part number for easy ordering
- Quick lead times
- Installation ready
- Cable entry gland
- Flexible design allows for future expansion
- Expandable modular patch panel design—copper or fiber media
- Includes the following documentations:
 - CAD drawing
 - Wiring diagram
 - Bill of material

Additional Products Available:

- Fiber and copper patch cords
- Fiber optic cable
- Category cable
- Fiber and copper patch panels
- SFP
- Pole mounting hardware

Every application is unique. Call your local Anixter representative for customizable options.
