Applications

- Gigabit data connectivity in harsh environments
- 1000Base-X Ethernet

Features

Cisco Compatibility – Guaranteed

Hardened Operating Temperature

EIA-364-65B, Class IIIA Certified

Conformal Coating

Digital Diagnostic Monitoring

Benefits

The TN-SFP-GE-x-C Series complies with the MSA standard and fully complies with OEM (such as Cisco) equipment without requiring a workaround and are truly “plug-and-play”

Reliably operates within a wide temperature range (-40C to +85C) for hardened environments

Passed EIA-364-65B, Class IIIA testing including exposure of the SFPs in Mixed Flowing Gas for 20 days that is the accepted equivalency of 10 years in a harsh environment

Protects against humidity, chemical and thermal variations, improves performance and reliability of SFPs subject to harsh environments

Allows access to real-time operating parameters, provides component level monitoring, fault isolation and failure prediction functions on their transceiver based applications

Note: The Transition Networks TN-SFP-GE-x-C series small form factor pluggable (SFP) transceiver modules are designed to install in any SFP port allowing for 1000Base-SX or 1000Base-LX interfaces to the network through the SFP connector. The TN-SFP-GE-x-C transceivers are Cisco Compliant* and are designed for bi-directional serial-optical data communication such as Gigabit Ethernet or fiber channel at speeds up to 1.25 Gbps.

*Transition Networks' SFP modules fully comply with the Multi-Sourcing Agreement (MSA). This compliance allows our SFP modules to be used in all other MSA compliant SFP platforms. In addition, Transition Networks SFP modules are also Compliant with all Cisco SFP-based routers and switches, as well as Cisco's IOS software. Transition Networks SFP modules ARE NOT Cisco OEM brand modules.
