Tripp Lite Introduces Safe-IT™ Antimicrobial Products for Safer, Cleaner, Healthier Workplaces

New Product Line Helps Protect Users and Installers of Frequently Handled IT Equipment

Chicago, IL (March 23, 2021)–Tripp Lite, a global manufacturer of power protection and connectivity solutions, has introduced Safe-IT™ products, a new collection of antimicrobial products designed to promote safer, cleaner and healthier environments for working and learning.

Frequently handled IT equipment can harbor harmful bacteria that can present a health risk to users and installers, especially in shared spaces. To address this issue, Tripp Lite Safe-IT products have antimicrobial or antibacterial properties to inhibit the growth of harmful microbes and/or UVC sanitizing lights to help disinfect mobile devices. This extra protection is essential in medical facilities, schools, businesses, food service environments and other locations where bacteria is a concern.

Model: N261AB-003-WH

Model: PS-606-HG

Model: CSC32ACWHG

The continually expanding Safe-IT collection includes the following products and features:

- [Cat6a Ethernet cables](#): antibacterial jacket, connectors and plugs
- [USB cables](#): antibacterial jacket, connectors and plugs
- [Audio/video cables](#): antibacterial jacket, connectors and plugs
- [Medical-grade power strips](#): patented antimicrobial coating
- [Medical-grade surge protectors](#): patented antimicrobial coating
- [AC and USB charging carts](#): UVC sanitizing lights and patented antimicrobial coating

“Tripp Lite has featured antimicrobial healthcare solutions for years,” said Glen Haeflinger, Tripp Lite President. “Applying similar technologies to other solutions was a natural, timely progression. Our Safe-IT product line confirms our commitment to offering protection and peace of mind to everyone who handles IT equipment.”
