VERISTREAM'S SOLUTION IS iVISITOR

Your employees and guests want instant access to every building they visit. But should they have it? How long will it take you to find out? And how many people are piling up at reception?

SECURITY AT SCALE

iVisitor is easy to use and enables global enterprises, multi-tenant buildings and businesses of all sizes to increase and improve security. iVisitor enables approved visitors to move quickly through lobby and security check points and keeps everyone else out.

iVisitor is a Software-as-a-Service (SaaS) solution that can be deployed globally to protect your enterprise, empower your employees, and treat all your guests like VIPs — around the clock, and around the world.

MILITARY STRENGTH

With heritage steeped in military security, Veristream's mission is to make sure that the biggest buildings and brightest businesses in the world stay more safe and secure — one visitor at a time. iVisitor has been the premium visitor management and temporary badging solution for the Fortune 500 since 2001. Veristream combines an acute focus on customer success with the most complete and integrated solution on the market.

WHAT WE DO

Veristream makes seriously smarter visitor management solutions designed to protect your enterprise, empower your employees, and treat all your guests like VIPs — around the clock and around the world. The biggest business and buildings in the world depend on iVisitor and Veristream to manage their visitors.

WHY CHOOSE VERISTREAM

SECURE

Our heritage is steeped in providing security and security systems for the US military and US Department of Defense. We draw on decades of military technology experience to create highly efficient, secure, and reliable systems that let approved visitors through quickly, and keep everyone else out.

SCALABLE

Veristream is great for smaller deployments. But it's even better for global organizations with multiple locations, or large buildings with lots of tenants. You get a central, SaaS-based solution with full customization abilities for every location, tenant, and user.

USER-FRIENDLY

What good is a visitor management system if no one can use it? Your employees and approved visitors deserve fast access to the right resources and facilities. Veristream makes checking in easy, with self-service kiosks, mobile applications, and even pre-registration for employees traveling to different offices, so they can skip the lobby altogether.

WHAT ABOUT EMPLOYEES AS VISITORS?

Not only can iVisitor register and check in visitors, we can also help employees with their next office visit. With iSiteAccess, Veristream enables employees and contractors the ability to request facility access and use one access card for each and every facility they visit. We even provide the ability to pre-screen employee visits, route facility access requests to the right people, and can automatically tell the access control system the dates and times when they should be able to enter a facility.

ISN'T IT TIME YOU HAD A SIMPLY SMARTER VISITOR MANAGEMENT SYSTEM?
