

Healthcare Visitor Management

Protect your patients, visitors, and staff

iVisitor is built for healthcare

Generic lobby solutions aren't built for the unique needs of hospitals, clinics, and other healthcare facilities. iVisitor Healthcare is built from the ground up to enhance security, preserve privacy, and provide the best experience available to your patients, visitors, and healthcare staff.

GET SECURITY AT SCALE

Protect one building, or one thousand. iVisitor Healthcare is built for local and major health systems alike.

GIVE PATIENTS MORE CONTROL

Patients can easily add friends and family to a pre-approved visitor list, for even faster check-in.

STAY COMPLIANT

The healthcare industry is full of complex regulations. iVisitor Healthcare helps drive compliance by enforcing consistent policies.

KEEP VISITORS WHERE THEY BELONG

Create multiple levels of access, and keep unauthorized visitors and employees out of areas they don't belong — like birthing centers, emergency rooms, and supply rooms.

MANAGE BOTH VENDORS & CONTRACTORS

Know who you are expecting, and who you aren't, so you can keep approved temp employees, contractors and vendors moving quickly — and everyone else out.

SEE THE FULL PICTURE

Work with our team to have banners and advertising material custom designed to your specification for marketing purposes on our site and across the web. Have all custom designed material link back to your website

THEY GET A VIP VISITOR EXPERIENCE YOU GET PEACE OF MIND

You get enterprise-grade security, efficiency, and scalability. Your visitors get a VIP-class experience — whether they're customers, vendors, or employees. Everybody wins.

HOSPITAL ADMINISTRATION CAN:

- **Screen visitors automatically** against system-wide “do not admit” lists and even local and federal criminal databases.
- **View detailed visitor reports** in real-time, or search historical reports.
- **Stay compliant** with vendor access requirements from HIPAA, the CDC, and others.
- **Provide the best visitor experience** in your market, to better compete in.

PATIENTS, VISITORS AND STAFF CAN:

- **Pre-register visitors** for even faster check-in
- **Check in quickly** using self-service kiosks
- **Get a visitor badge in seconds**, not minutes
- **Visit more often and more easily**, thanks to durable, bar-coded badges for frequent long-term visitors.

GET ALL THE CONTROL WITH NONE OF THE HEADACHES

iVisitor runs in the cloud so you can stop maintaining costly servers and software.

- No more software and server crashes — iVisitor is entirely online
- Eliminate the need for IT support
- Enjoy 99.995% uptime, around the clock
- Define as many levels of user authority as you need — including employee, executive, and security users.

THE PROTECTION YOU EXPECT. THE PERIPHERALS YOU NEED.

Custom Badges, Scanners, Printers, Touch Screens, Kiosks, Cameras, Bar Code Readers
