

Customer Testimonials

Westell's In-building Wireless (IBW) group, formerly Cellular Specialties, Inc. (CSI) focuses on product innovation and thought leadership in the repeater industry. Utilizing state-of-the-art components, Westell's IBW group was the first company to introduce a digitally filtered repeater capable of passing all of the wireless service provider spectrum requirements. The DSP85 repeater and the digital architecture the product embodies has become a requisite for the nation's largest wireless carriers.

Here is what our customers have to say about our digital repeaters...

In-Building Cellular

"One of the primary reasons we continually turn to Westell's digital repeaters is the Web-based graphical user interface (GUI). Most customers lack the time to monitor their DAS around the clock. The repeaters' GUI allows for effortless set up and monitoring via a standard Web browser. The repeater can be remotely monitored and accessed by outside experts who can quickly respond to a host of troubling shooting scenarios."

Jim Hachey
Vice President
In-Building Cellular

Mobile RF Solutions

"When Westell introduced its modular series of digital repeaters, it made our decision on which company to do business with that much easier. The ability to choose between a rack and wall mounted configuration is a significant consideration given the different types of installs we perform. Add to that the flexibility that comes with being able to support up to four different frequency bands and the choice was clear. The customer service and response to real world problems is extremely valuable to integration companies. Your technical support team has gone to great lengths to support our past deployments."

Brian Troia
Owner
Mobile RF Solutions, Inc.

Seemless Cellular

"Westell's line of digital repeaters is our 'go-to' repeater choice. The DSP's ability to expand from a single-band up to four bands and the clean configurations - thanks to the multiple input and output port options - makes Westell's repeaters among the most versatile in the industry."

Bill Rogers
Owner/Director
Seemless Cellular

Alcatel-Lucent

"There are very few companies that respond to their customers as quickly as Westell. From the speed at which orders are shipped to the timeliness to which any of my product questions are answered, Westell's product sales and technical support are truly customer-focused."

Jim Jones
DAS Systems Solutions Engineer
