

Summary

Code Blue's Cloud ToolVox® solutions are an effective way to provide communication for emergency speakerphones. The robust platforms act as a future-proof hub for all of your emergency communication needs.

Choices

Managed Cloud

Allows Code Blue to manage ToolVox services and support for your location.

Consumer Cloud

Gives you the ability to utilize and administer ToolVox software at your location.

Features

Connection Options

- ✓ LAN, WAN, Wi-Fi and 4G LTE connectivity; multiple connections available for redundancy
- ✓ Cloud-based SIP registration
- ✓ Diagnostics
- ✓ DID/e911 support
- ✓ Secure connections
- ✓ Ability to connect multiple locations to a centralized system
- ✓ IP and analog device support

Systems Management

- ✓ Managed services
- ✓ Pre-configured units
- ✓ Superior performance, service and support
- ✓ Custom engineering and technical support

Benefits

Futureproof

Our system is constantly updated and managed. As technology advances, you will receive the most up-to-date software releases, rather than being responsible for staying up to date or keeping someone fully trained on administrating those updates.

Flexibility

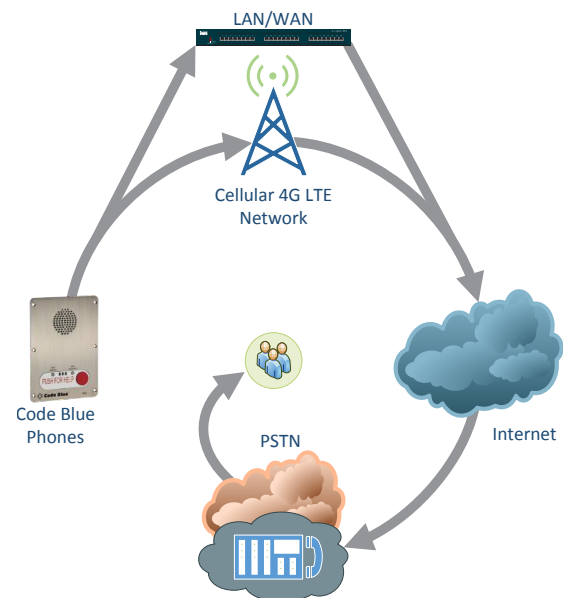

Our solution can significantly alleviate network infrastructure costs while also reducing Customer Premise Equipment (CPE) requirements.

Scalability

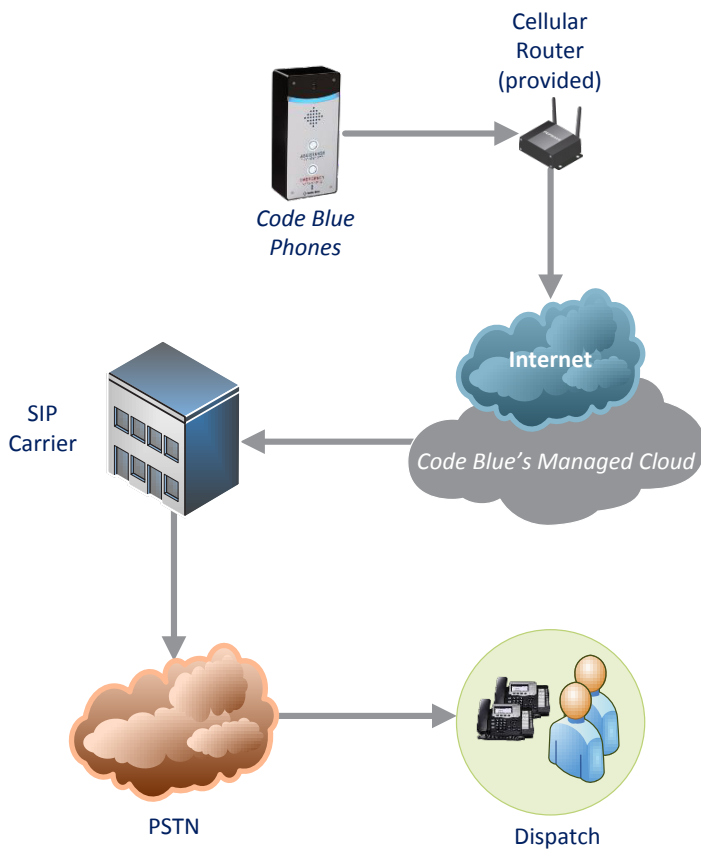

Our Managed Cloud platform provides you with the ability to support many devices and offer growth protection.

Ease of Installation

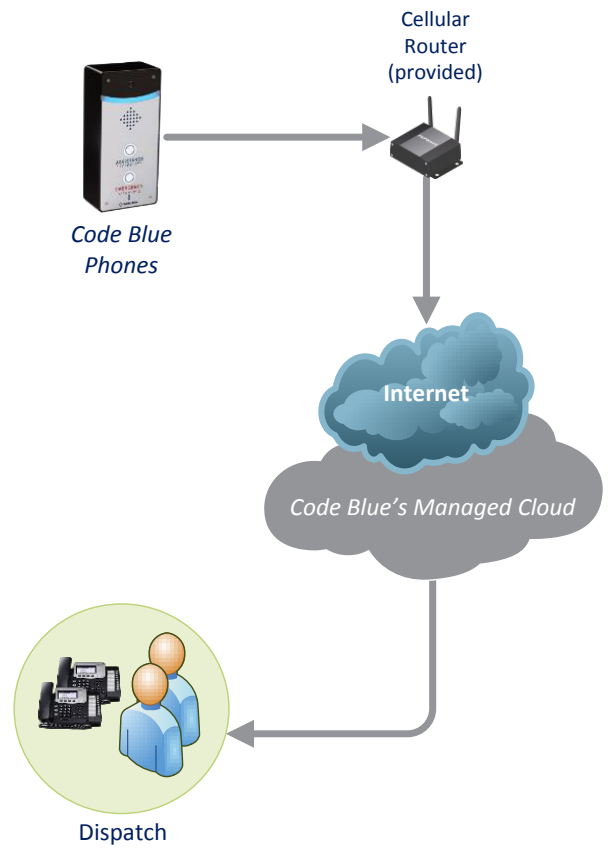

Our Managed Cloud products come pre-configured and ready for deployment, eliminating labor-intensive installation requirements and ongoing administration.

DID/e911 call routing

Extension-to-extension call routing

Optional Enhancements

- ✓ Redundant connections and call routes
- ✓ Solution design assistance
- ✓ Priority call routing
- ✓ Mass Notification and Incident Response software
- ✓ SIP desk phones for cloud-based dispatch extensions
