

To Our Valued Customers and Business Partners:

You may have heard that going into effect on Tuesday, March 24, 2020 at 11:59 p.m. Central Time, the City of San Antonio has implemented a “Stay Home, Work Safe” order for all residents and non-essential businesses.

Some of you may be wondering what that means for AccelTex Solutions since we are headquartered in the city of San Antonio, TX.

AccelTex Solutions provides **essential** services for vital operations such as government entities, healthcare facilities and education institutions.

Therefore, our logistics center will remain open and will continue to fulfill the most critical needs for wireless network products and accessories.

The majority of our staff is working safely at home and have been equipped to maintain routine business matters on a virtual basis. We have limited on-site business operations to the essential staff in our warehouse and logistics center to ensure that order fulfillment and deliveries continue with minimal interruption.

We value your business and strive to continue to provide exceptional service through these challenging times.

Sincerely,

Carter J. Burke, CEO
and
Chris Marco, President
