

Here is the latest official statement around the virus and our continued efforts to stay ahead of product issues.

CommScope Update on Coronavirus (COVID-19)

CommScope continues to track the Coronavirus (COVID-19) outbreak globally and to mitigate its impact on our manufacturing operations.

We have ramped up our manufacturing operations at our Suzhou factories and our contract manufacturing sites. All factories are operational, although at reduced staffing levels. We expect staffing levels to continue rising over the coming weeks.

The CommScope Supply Chain team is working closely with our suppliers to secure materials and with our logistics partners to manage shipments, with air freight in the region not yet at full capacity.

We are experiencing some extensions in lead times for product deliveries. For specific information about an order, please contact your CommScope Sales representative. We will work diligently to get you a prompt response.

Our teams are working to maintain operations while trying to ensure the safety of our employees, customers and suppliers. We appreciate your patience and thank you for your continued partnership.
