Coronavirus (COVID-19) Statement

March 6, 2020

Honeywell's Integrated Supply Chain (ISC) & Procurement organizations have been closely monitoring the potential impact of the Coronavirus on our supply chain as many of the components for our products come from China. At this time, we do not see an immediate threat to our ability to manufacture due to several pre-emptive measures which were taken including a stock-up in anticipation of the Chinese New Year and direct communication with the manufacturers to ensure Honeywell's orders were prioritized. We've also been notified that most of our suppliers' production facilities in China are back to 60%+/- capacity which will help to ensure a continued flow of materials. With that said – this is a very dynamic environment that our teams are monitoring daily. Should the situation change we will provide updates so that you can adequately plan for any potential delays / interruptions.

Sincerely,

Daraius Patell
VP / GM Fire Americas
