Air freight quoting process & restrictions

Due to the airfreight restrictions and rising costs resulting from COVID-19 we reluctantly are being forced to make the following changes to our quoting process.

- All air shipments from Europe will be quoted separately with air freight charges based on weight and dimensions.
- Quoted air freight cost and lead times are estimates only, subject to change at time of booking.
- Sea freight quotes remain unchanged at this moment – 6-8 weeks to New Jersey. We will inform you if the situation changes.
- Standard B&C quotes with a lead time of 3 - 4 weeks to New Jersey are not available at this time.

Non-deliverable shipments & transport charges

If our transport partners attempt delivery and they are not able to deliver your shipment, unfortunately you will still be responsible for all shipping, redirect, or other incurred transportation charges.

We do apologize for this inconvenience, and will continue to keep you advised of any changes to your shipment or delivery.

Thank you for your anticipated response and understanding during these COVID-19 times of uncertainty.

Sincerely,

A handwritten signature in black ink that reads "Stella Kaplansky".
