

# Leviton Statement on COVID-19

[Leviton statement on COVID-19.](#)

Leviton is adhering to all regulations and guidelines from government authorities related to containment of COVID-19. All of Leviton's manufacturing and distribution sites globally have implemented precautionary measures to minimize exposure to COVID-19.

At this time, Leviton manufacturing and distribution operations are operating at full capacity including our facility in China. We are working closely with our suppliers and continue to maintain good material flow.

The safety and well-being of our employees remain our top priority. We have activated a work from home policy where possible for the next two weeks effective Monday March 16, 2020. This action will not impact our ability to service customers or provide support in any way.

Leviton is monitoring the situation closely, considering information from international health agencies, local governments and our own safety and security protocols.
