

To our valued customers,

We are committed to serving all of your needs for personal protective equipment and safety, both now and in the future. Unfortunately, as you know, the COVID-19 coronavirus has disrupted the supply chain for products manufactured in China. We want to assure you that we have enough inventory of affected products to meet existing customer demand at this time and that our top priority is to maintain stock for your industrial safety needs.

There are still many unknowns, and the longer the outbreak continues, the more upheaval there may be. We await further information from the CDC and the World Health Organization on the most recent data and predictions.

Chinese factories are said to be reopening in the coming days, but for now we are implementing new rules to ensure that your needs continue to be met for affected items including\*:

- Respirators and masks of all types
- Disposable gloves
- Coveralls
- Goggles
- Disposable protective clothing

\*Please note that new items may be added to this list as the situation develops.

**For new customers** -- we will not fill orders on these items.

**For existing customers who regularly rely on us for these products** -- we can fill orders *based on your consistent usage over the last 6 months*. We will be unable to fill orders for quantities above this usage.

As a leader in personal protective equipment, we are increasing production and purchases to meet the additional demand as quickly as possible. We continue to closely monitor conditions and will keep you updated as more is known.

Sincerely,

The Magid Team
