Dear Customers, Partners and Friends,

As an update to our previous communication, Superior Essex continues its commitment to keeping our employees, customers and partners safe during the COVID-19 outbreak. As such, we continue to align with the Center for Disease Control guidelines in our response to COVID 19. Our production facilities remain fully operational and continue producing and shipping our vital products. We do so while focusing on social distancing, clean workplace environment and promoting good hygiene. We also continue to limit visitors to our facilities as well as encouraging non-production employees to work from home.

In a previous communication we noted that Superior Essex was designated as an essential business by the Cybersecurity and Infrastructure Security Agency (CISA). As a major supplier of cabling for Communications, Power and Data Networking for many essential industries including Telecommunications, Medical and Transportation, Superior Essex continues to maintain an essential designation despite many local governments imposing additional directives. All employees who are needed on-site have been granted permission to continue to work on premise, ensuring full operation while maintaining compliance with government mandates. We assure our operations are conducted while strictly adhering to guidance provided by the CDC, OSHA, and other government agencies.

At the same time, we continue to perform vigorous analysis of our liquidity and operational conditions on an on-going basis. Based on our latest analysis, we believe that our financial and business fundamentals continue to be strong.

As we push through this difficult time we will continue to focus on the health and safety of our employees, customers and partners. By taking these proactive measures, we will continue to maintain continuity of supply to our customers. If you have any questions please contact any of your friends at Superior Essex.

Please be safe and stay healthy,

Brad R. Johnson
President
