

SYSTIMAX® Solutions

GigaSPEED® XL

Solution Guide

SYSTIMAX® GigaSPEED® XL Solution

The SYSTIMAX GigaSPEED XL Solution offers performance far beyond Category 6 standards, cost-effective design innovations and reliability so robust it can help make network downtime a thing of the past.

Built on the SYSTIMAX 360™ design philosophy for next-generation infrastructure, the GigaSPEED XL Solution is truly a network without limits.

Engineered with customers in mind, the solution couples design freedom, speed and intelligence in an easy to use package. Customers can build networks with guaranteed performance that meet their individual configuration needs and have the option to deploy intelligence upfront or whenever they desire. By integrating CommScope's industry-leading network intelligence solution, customers have complete visibility and control of their physical layer infrastructure now or in the future with a simple field upgrade.

The CommScope Labs Effect

Proprietary design and manufacturing techniques developed by CommScope Labs makes the GigaSPEED XL Solution one of the most reliable and flexible high-performance Category 6 U/UTP media in the world. Customers have the freedom to design 100-meter channels as well as short channel configurations with cables and cord lengths as short as they desire, offering maximum flexibility and minimizing excess cable and patch cord lengths especially important for data center applications. Customers can also deploy channel configurations utilizing between two (2) and six (6) connectors to meet their own individual design needs while still surpassing Category 6 performance criteria. This design freedom makes deploying infrastructure for data center and intelligent building applications simple.

Meet the industry-leading Category 6 U/UTP connectivity solution in the world today

Proprietary design and manufacturing techniques developed by CommScope Labs make GigaSPEED XL cabling one of the most reliable high-performance U/UTP media in the world. It can easily handle Gigabit Ethernet, 1.2 gigabit ATM, even 270 Mb/s Serial Digital Video and is backward compatible to keep your legacy applications running at peak efficiency

Why Performance Matters

Category 6 standards set the minimum performance requirements for a Category 6 installation to work. There is zero margin for error. Vendors that claim "Cat 6 compliance" often base that claim on the fact that individual components were able to achieve this performance, on average, in lab tests, at a specific frequency. "Average" performance in lab tests does not take into account real world conditions such as network congestion, less-than-perfect installation, and imbalance among components. In the real world, many systems simply will not have enough headroom to cope. GigaSPEED XL Solutions provide the headroom you need for the real world with performance margins up to 300% better than Category 6 standards.

Ask the Tough Questions

In the trade magazines you'll see impressive claims from many companies. Read the ads, then evaluate them by asking a few difficult questions:

- Can the company guarantee significant channel margin over the entire frequency range, from 1 to 250 MHz? We can.
- Are performance claims valid for the entire network channel, end to end, from equipment closet to desktop? Ours are Guaranteed.
- Does the company design, manufacture and test every component? Every channel? We do.
- The Big Question: Are advertised performance claims guaranteed in the warranty, for existing and future applications, for 20 years? Ours are.

In today's economy, these are the questions that could determine your company's future. Be skeptical of long answers. We believe that only one company can answer all of these questions in one word: Yes.

The Tools our Competitors Envy

Most vendors measure the performance of individual components. But in real-life use, these figures have little meaning. At the ultra-critical tolerances required to run Category 6 applications, even a slight imbalance among Category 6-compliant components can cause frequent slowdowns and network failures. To build the world's most reliable cabling system, the scientists and engineers of CommScope Labs developed the most advanced network analysis tools in the world today: Modal Decomposition Modeling, Connector Field Pattern Modeling and Cable Twist Accuracy Technology. These proprietary tools and techniques allow us to match the performance characteristics of every component with a level of precision no other company can approach. We believe that this is the only way to assure full Category 6 performance throughout your complete network – closet to desktop – under all conditions. Which is why no other company warrants guaranteed worst-case channel performance claims in writing, like we do.

PERFORMANCE OF THE GIGASPEED XL SOLUTIONS

4 Connector Channels:	GigaSPEED XL Worst Pair Margin (1-250 MHz)	
	Guaranteed	Typical
Insertion Loss	5.00%	6.50%
Pr-Pr NEXT	6.0 dB	9.4 dB
PSNEXT	7.5 dB	10.6 dB
Pr-Pr ELFEXT	6.0 dB	11.3 dB
PSELFEXT	8.0 dB	12.7 dB
Return Loss	4.0 dB	5.7 dB

GigaSPEED XL Solution performance with four connector channels.

Figures valid at any frequency of certified channel comprising GigaSPEED XL cable & apparatus.

PERFORMANCE OF THE GIGASPEED XL SOLUTIONS

6 Connector Channels:	GigaSPEED XL Worst Pair Margin (1-250 MHz)	
	Guaranteed	Typical
Insertion Loss	4.0%	5.5%
Pr-Pr NEXT	4.0 dB	7.4 dB
PSNEXT	5.5 dB	8.5 dB
Pr-Pr ELFEXT	4.0 dB	8.9 dB
PSELFEXT	6.0 dB	10.4 dB
Return Loss	2.0 dB	5.2 dB

GigaSPEED XL Solution performance with six connector channels.

Figures valid at any frequency of certified channel comprising GigaSPEED XL cable & apparatus.

This chart shows just one of many reasons why our GigaSPEED XL Solution leads the industry, worldwide. Our proprietary system-level design techniques assure guaranteed channel margin across the entire frequency range.

Our GigaSPEED XL Solution exceeds the Category 6 standard by 6 dB and is so advanced that it can support 6 connection points – with generous margin to spare over Category 6 specifications; (see table on page 5).

Please note that these are guaranteed, end-to-end channel performance figures. We welcome comparisons to competitive solutions in the market place.

Highlights from the Best Warranty in the Industry

- All GigaSPEED XL Solutions are backed by a 20-year Extended Product Warranty that we believe to be the best in the industry.
- Our Application Assurance covers everything from voice, data and video applications to standards-based complex building management systems by some of the world's leading manufacturers.
- We will specify the performance of each application – not “average,” not “nominal,” as many companies do, but guaranteed worst-case channel performance – and we will warrant that your certified SYSTIMAX GigaSPEED XL Solution will meet or exceed those specifications for 20 years.
- GigaSPEED XL Solutions are so advanced that we can even guarantee the performance of applications that do not yet exist. Specifically, we will warrant any applications introduced by recognized industry standards-setting bodies or user forums that specify ANSI/TIA-568-C.2 or ISO/IEC 11801 components and link/channel specifications for the pertinent cabling system.

We Build Solutions. Ask us.

- We have far more to explain about how our systems can help solve your immediate and future challenges. Our research has yielded many innovative solutions that cannot be detailed in this small brochure.
- To learn more, please visit our Web site at www.Commscope.com or contact your CommScope representative. We'll be glad to explain how we've surpassed the expectations of companies large and small, around the world. And how quickly, easily and inexpensively we can do the same for you.

SYSTIMAX® GigaSPEED® XL 71 Series Cable

SYSTIMAX GigaSPEED® XL 1071E Series Cable

SYSTIMAX GigaSPEED® XL 2071E Series Cable

SYSTIMAX GigaSPEED® XL 3071E Series Cable

Non-plenum

The Non-plenum 1071E 4-Pair GigaSPEED XL Cable meets or exceeds Category 6/Class E attenuation and NEXT requirements in ISO/IEC 11801, CENELEC EN50173 and ANSI/TIA-568-C.2. Further, these cables are ETL listed as Category 6. The 71E GigaSPEED XL cables feature a patent-pending thin and easy-to-remove bisector tape that delivers the performance benefits of more traditional fluted center members without the associated stiffness and size.

Plenum

The Plenum 2071E 4-pair GigaSPEED XL Cable meets or exceeds Category 6/Class E attenuation and NEXT requirements in ISO/IEC 11801, CENELEC EN50173 and ANSI/TIA-568-C.2. Further, these cables are ETL listed as Category 6. The 71E GigaSPEED XL cables feature a patent-pending thin and easy-to-remove bisector tape that delivers the performance benefits of more traditional fluted center members without the associated stiffness and size. The 2071E 4-pair cable is composed of bare solid copper conductors. The core of twisted pairs is jacketed with a low smoke PVC. It conforms to the low flame, low smoke requirements of the NEC.

LSZH

The LSZH 3071E 4-pair GigaSPEED XL Cable meets or exceeds Category 6/Class E attenuation and NEXT requirements in ISO/IEC 11801, CENELEC EN50173 and ANSI/TIA-568-C.2. Further, these cables are ETL listed as Category 6. The 71E GigaSPEED XL cables feature a patent-pending thin and easy-to-remove bisector tape that delivers the performance benefits of more traditional fluted center members without the associated stiffness and size. 3071E cable is composed of solid copper conductors insulated with non-halogen high-density polyethylene and jacketed with a low smoke zero halogen compound.

SPECIFICATIONS

	1071E	2071E	3071E
Nominal Outer Jacket OD	0.232 in (5.89 mm)	0.224 in (5.69 mm)	0.231 in (5.87 mm)
Nominal Outer Jacket Thickness	0.022 in (0.56 mm)	0.020 in (0.51 mm)	0.020 in (0.51 mm)
Maximum Pulling Tension	25 lbs (11.3 kg)	25 lbs (11.3 kg)	25 lbs (11.3 kg)
Nominal Cable Weight	25.6 lbs/kft (38.2 kg/km)	29.1 lbs/1,000 ft (13.2 kg/304.8 m)	25.0 lbs/kft (39.3 kg/km)
Operating Temperature	-4°F to 140°F (-20°C to 60°C)	-4°F to 140°F (-20°C to 60°C)	-4°F to 140°F (-20°C to 60°C)

SYSTIMAX® GigaSPEED® XL Patch Cords

SYSTIMAX GigaSPEED® XL GS8E

The GS8E Modular Patch Cord family of high bandwidth cords form parts of the GigaSPEED XL cabling solution. Electrical performance exceeds TIA and ISO/IEC Category 6/Class E specifications and is fully backward compatible with Category 5e and 5 connectors.

The GS8E Modular Patch Cord comes in a wide variety of variation which includes plenum, Low Smoke Zero Halogen (LSZH), stranded conductors, solid conductors, straight through wiring, crossover wiring and rollover wiring to meet different application needs.

The GS8E-S solid conductor cords consist of solid conductor cable, factory terminated with GS8E plugs.

The GS8E-SP is a solid plenum version of GS8E patch cord which provides extra margin on fire safety.

The GS8E-L, Low Smoke Zero Halogen (LSZH), is a stranded GigaSPEED XL Solution cord and GS8E-SL is a LSZH solid cable assembly which is terminated with GS8E plugs.

Patented plug design, improved 24 gauge cordage and a unique manufacturing process assure excellent electrical performance and low variability. Improved anti-snag feature provides maximum protection from snagging during moves and rearrangements.

GS8E GIGASPEED XL MODULAR PATCH CORD

SYSTIMAX® GigaSPEED® XL Information Outlet

**SYSTIMAX GigaSPEED XL
MGS400-318 and MGS400-262**

The MGS400 Information Outlet features proprietary crosstalk cancellation techniques for superior near End crosstalk (NEXT and PSNEXT) performance that provides unmatched throughput performance when installed as part of a complete GigaSPEED XL channel. The solution is guaranteed to exceed the Category 6/Class E channel specifications for ISO/IEC and TIA, even under the worst case channel configuration.

The MGS400 snaps into any CommScope modular faceplate, frame, or surface-mount box and can be mounted at either 90 degrees (straight) or 45 degrees (angled). Multicolored identification labels assure fast and accurate installation. A low profile wire cap protects against contamination and secures connections.

SYSTIMAX 360™ GigaSPEED® XL 1100GS3 Panel

The GigaSPEED XL 1100GS3 Panels are available in 1U and 2U options and feature the elegant SYSTIMAX 360™ design. Enhanced rear cable management features make installation easier over current cable bundling/dressing methods by reducing time and steps to tie down bundles of cable on the rear of the panels.

CommScope's new panel platform, Evolve, is an intelligent/intelligent-ready modular panel system designed to accommodate unshielded multi-connector modules, individual shielded information outlets, pre-terminated copper trunks and future connector designs. For applications that demand intelligence today, the panel platform offers built-in intelligence, providing insight deep into your network for vision, knowledge and control of your network infrastructure. If, however, you are not ready for intelligence today but want the flexibility to add it later, the intelligent ready panel platform allows customers to evolve to intelligence deployments as their network needs change. Supporting architectures with shorter cords and cables and delivering improved performance, this new panel platform makes 10G easier – and life better – than ever before.

SYSTIMAX 360™ Modular Panel

**SYSTIMAX 360 Modular Panel,
24 Port**

**SYSTIMAX 360 Modular Panel,
24 Port, Rear View**

The SYSTIMAX 360™ Modular Panel is part of the next generation SYSTIMAX 360 solutions platform. The 360 Modular Panel eliminates the need for separate tie wrap components and offers facilitated installation and panel dressing through simplified cable bundling. The 360 Modular Panel supports the deployment of InstaPATCH Cu pre-terminated copper solutions and features the elegant SYSTIMAX 360 design.

SYSTIMAX 360™ GigaSPEED® XL PATCHMAX® GS3

The GigaSPEED® XL PATCHMAX® GS3 Panels offer easy cable routing and bundling utilizing the rear cable manager and are available in a 24 port configuration. The 360 PATCHMAX GS3 panels also support deployment of InstaPATCH® Cu pre-terminated copper.

The PATCHMAX GS3 panels accept four (4) PATCHMAX GS Distribution Modules which can be rotated forward, allowing front-access to the 110 type IDC terminals for easy cable termination. PATCHMAX GS Distribution Modules feature an innovative termination manager and rear housing which provides easier, faster, more reliable terminations and reduced variability in the placement and termination of cables to the panel.

The GigaSPEED XL PATCHMAX GS3 Panel's rear cable manager makes cable round and bundling easy. The panel is available in a 24 port (2U) configuration and 1 to 24 port labelling and identification.

CommScope® M4800/M4800A 1U High Density Modular Panel

CommScope M4800 1U High Density Modular Panel

CommScope M4800A 1U High Density Modular Panel

Unlike traditional 48 port panels, the M4800/4800A panels occupy only 1 U of rack space. The M4800-1U-GS panels accommodate GigaSPEED XL and X10D MGS Information Outlets while the M4800-1U-PS panels accommodate PowerSUM Information Outlets.

Features and benefits

- Available in a 48 port (1U) configuration
- Angled or flat
- Supports both 10G, 1G and 100M applications
- Supports all copper modular connectors
- Panel kits include low profile module stuffer caps
- InstaPATCH® Cu friendly design which coincides with scalability
- Optional rack mountable rear cable management system
- Offers both front and rear accessibility
- Qualifies for CommScope's 20-Year Extended Warranty and Applications Assurance when included as part of a registered solution
- Compatible with DYMO Labeling Solution

CommScope® M2000 Modular Panel

The M2000 Modular Patch Panel is a panel designed for CommScope outlets that can be configured for copper, fiber, or both and is available in 24-port (M2000-1U) and 48-port (M2000-2U) versions. Both the M2000-1U and M2000-2U panels mount in a 19-inch (483 mm) rack with universal hole spacing.

The M2000-1U and M2000-2U Panels include M2000 Cable Organizers. The M2000 Cable Organizer is a molded plastic design that is snapped into each 6-port bezel. The 24 port 1U panel includes 4 cable organizers and the 48 port 2U panel includes 8 cable organizers. The six 4-pair cables from each bezel are routed and positioned to the cable organizer. Cable ties are included to secure the cables.

The M2000 angled panels include a cable management bar (cable organizers are not included with the M2000 1U and 2U angled panels). These patch cord managers are metal rings that mount to the front of the panel. 5 patch cord managers are used for each 24 port 1U panel.

Features and benefits

- Electrical performance guaranteed to meet or exceed the channel specifications of Amendment 1 to ISO/IEC 1180:2001 Class E_A and ANSI/TIA-568-C.2 Category 6A up to 500 MHz when used as part of a GigaSPEED X10D U/UTP Channel in registered SYSTIMAX installations
- Available in 24-port and 48-port configurations
- Labeling and identification for each port
- Supports copper and fiber connectors
- Compatible with DYMO Labeling Solution
- Electrical performance guaranteed to meet or exceed ANSI/TIA-568-C.2 Category 6 and ISO/IEC Category 6/Class E specifications when used with MGS400 connectors

CommScope® M2100 Modular Panel

CommScope M2100 24-Port Panel

The M2100 Modular panel is available in a 24-port 1U and 48-port 2U configuration with integrated horizontal front cord managers, eliminating the need for separate cord management. The M2100 includes 4 or 8 plastic rear cable organizers, each holding up to six 4-pair cables. The M2100 also includes vertical mounting labels and label holders providing space for identification of each port. Port designations can be printed on the label sheet. Individual port labels are trimmed from the label sheet, placed in the label area, and secured by the clear label holder. If adhesive labeling is desired, adhesive labels can be applied to the label holder. This panel supports copper M-series outlets as well as fiber applications.

CommScope M2100 48-Port Panel

Features and benefits

- Consists of a rack mountable base unit with front integrated cord management
- Bezel labels with label holders included for standard port numbering
- Mounts to 1 9-inch (483 mm) equipment rack with universal hole spacing
