Increase peace of mind with a layered security approach.

COMMERCIAL BUILDING RISK MANAGEMENT

In today’s world, there is a strong emphasis on providing a secure and safe environment for a modern workforce. Reducing risk and increasing peace of mind allows staff to focus on the task at hand. Anixter’s layered physical security approach provides you with the ability to deter, detect, deny, defend and detain at every layer of your commercial building.

WHAT WE HEAR
Challenges from the various commercial building stakeholders are:

- Providing a **SAFE** workplace
- Reducing **THEFT**
- Achieving **REGULATORY** COMPLIANCE
- Preventing **CYBER** THREATS
- Limiting physical building and network **ACCESSIBILITY**

VISITOR SAFETY
The future of commercial security will see a split between practicing reactive security and proactive security.

Infrastructure as a Platform by Anixter provides a practical, configurable and integrated approach to deploy physical security infrastructure into your commercial building environment.

**FIVE LAYERS OF PHYSICAL SECURITY**

*The Anixter Approach*

- **Property Perimeter**
  Establish a physical boundary around the property edge to deter external threats.

- **Reception Area**
  Control visitors to the facility and validate various levels of staff authorization.

- **Floor Levels**
  Monitor visitor and employee traffic for safety and access to various parts of the building.

- **Specialized Zones**
  Secure assets and comply with privacy regulations with attention to specialized departmental zones.

- **Technical Space**
  Protect networking infrastructure, IT servers and data storage in technical areas.

In addition to micro-segmentation of logical security, our approach provides commercial building managers with a clear set of guidelines and best practices for macro-level security implementation.

- **Property Perimeter**
  Establish a physical boundary around the property edge to deter external threats.

- **Reception Area**
  Control visitors to the facility and validate various levels of staff authorization.

- **Floor Levels**
  Monitor visitor and employee traffic for safety and access to various parts of the building.

- **Specialized Zones**
  Secure assets and comply with privacy regulations with attention to specialized departmental zones.

- **Technical Space**
  Protect networking infrastructure, IT servers and data storage in technical areas.

**YOUR RISK MANAGEMENT PLATFORM**

*Anixter Engagement Process*

1. **QUALIFY**
   Understand your current state and business drivers

2. **ASSESS**
   Identify gaps in your current security infrastructure

3. **PLAN**
   Define actionable solutions and configurations to execute

4. **TRIAL**
   Propose proof of concept with Anixter Technology Partners

5. **DEPLOY**
   Deliver your project on time and under budget

You can further strengthen your protective measures and enable interoperability by leveraging our expertise in technology sourcing, inventory management, product enhancement, logistics and eCommerce tools.

**PRODUCT SOLUTIONS**

- Video and access control software
- Network surveillance cameras
- Video servers and storage
- Ethernet switches
- Electronic and mechanical door hardware
- Keypads and readers
