

How will a colocation change the way IT resources are managed?

MULTI-TENANT DATA CENTRE RESOURCE MANAGEMENT

As enterprises face increasing pressures to support the business quickly and efficiently, IT and facilities managers must leverage a variety of internal and external resources to respond to those needs.

PROJECT MANAGEMENT CONSIDERATIONS

WHAT WE HEAR

Challenges from the various colocation stakeholders are:

IMPROVING time to market

OPTIMISING workforce productivity

QUALITY of installation

SHORTAGE of diversified skill sets

INTEGRATION of various subsystems

DEMANDS OF THE BUSINESS GROW

55% of global IT executives feel that IT's biggest challenge in 2016 is to provide high levels of service to increasingly tech-savvy customers and employees.

Infrastructure as a Platform
by Anixter

Infrastructure as a Platform by Anixter provides a practical, configurable and integrated approach to help you manage IT resources in a multi-tenant data centre (MTDC).

DATA CENTRE PROJECT COLLABORATION

The Anixter Approach

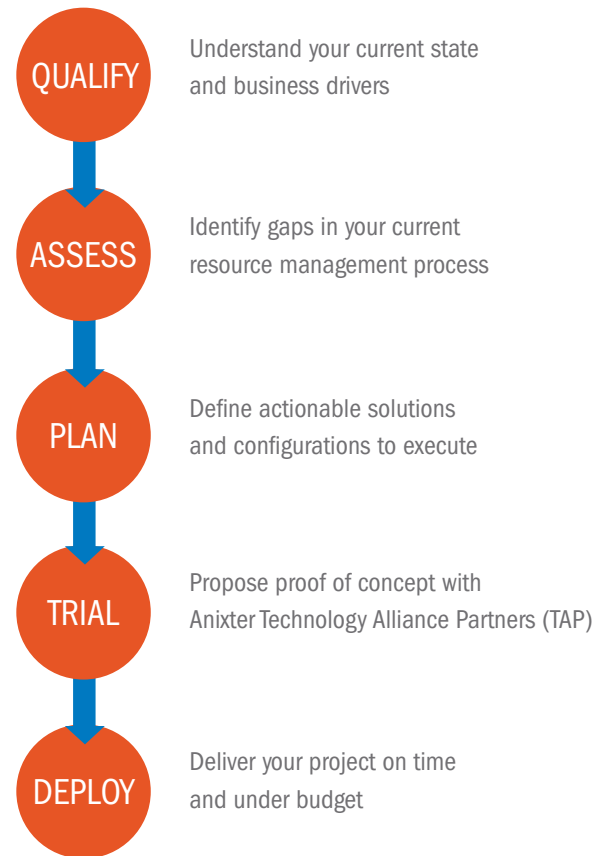

Anixter understands that in today's digital world, IT must effectively manage a combination of internal and external resources to support the needs of multiple business leaders within an organisation. Anixter's approach focuses on six areas that can impact the way resources are managed and reduce the costs of IT project deployments.

- Project Management**
 Define the required steps, allocate the right resources and set project milestones to reduce delays and downtime.
- Smart Hands**
 Leverage third-party resources for ongoing remote hardware and software support to enable IT managers to utilise in-house resources more cost-effectively.
- Installation and Integration**
 Establish a repeatable, defined scope of work and utilise certified installation partners to improve deployment times and quality of delivery.
- Off-Site Configuration**
 Eliminate non-productive labour through services like product assembly and preconfiguration to help IT teams complete their projects on time and under budget.
- Inventory Management**
 Outsource the material management process for complex data centre deployments to release working capital and increase speed to market.
- Technology Evaluation**
 Remove the challenge of evaluating a multitude of supplier offerings by leveraging a partner with expertise in technology from best-in-class manufacturers.

YOUR MULTI-TENANT DATA CENTRE SELECTION PLATFORM

Anixter Engagement Process

You can further enhance resource management and enable interoperability with your business goals by leveraging our expertise in technology sourcing, inventory management, product enhancement, logistics and eCommerce.

PRODUCT AND DEPLOYMENT SOLUTIONS

- Material management
- Product pre-assembly, configuration and labeling
- Dedicated project inventory
- B2B ordering, tracking and consolidated invoicing
- Local, regional and global logistics
- Intelligent patching solutions
- Multi-tenant data centre alliance partners
- Scalable power and cooling solutions
- Pre-terminated copper and fiber trunks
- High-density copper and fiber patching infrastructure
