

A photograph of high-voltage electrical infrastructure, including metal towers, insulators, and power lines, set against a clear blue sky.

POWERING THE MOST INNOVATIVE SOLUTIONS FOR ENERGY PROFESSIONALS

The Anixter Difference

As an energy professional, you face constant reliability, regulation, security and safety challenges. Our industry-leading portfolio of services help you meet these challenges and realize labor and supply chain stability and efficiency. Our collaborative and customizable approach coupled with an extensive history of successful implementation and execution can help you exceed the expectations of your customers and stakeholders.

Technical Expertise

Anixter understands the various power, safety and security challenges you face. From system interoperability and standards to the integration of perimeter security, access control and video surveillance, our technical solutions managers provide an unbiased-manufacturer approach.

- Advanced metering infrastructure
- Meter data management
- Prepayment and customer portal
- Cybersecurity
- Supervisory control and data acquisition
- Distribution automation
- Lighting design services
- LED solutions
- Meter installation and change-out services
- Inspections and tests on products
- Tool applications and training
- Product safety training

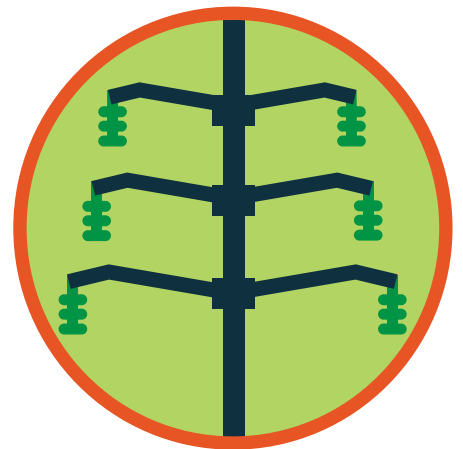

Services

Reducing costs, saving time, improving productivity and mitigating risks are our goals for every customer and project. With our customizable Supply Chain Solutions, you can eliminate costs, address sustainability requirements, enhance focus on your core competencies and stay competitive in the marketplace.

- Materials management and disposition
- Critical spares management
- Custom warehouse services
- Material packaging QA/QC
- Custom and event kitting
- Turnkey yard layout and management
- Remote inventory tracking
- Automated inventory solutions
- Wire and cable management solutions
- Customized metrics and reporting
- eCommerce

Global Capabilities

Anixter has over 100 warehouses in the U.S. and Canada and locations in over 300 cities and approximately 50 countries.

Our Products

Anixter carries more than 300,000 products for utility customers.

- Access control
- Alarms, horns, signaling devices
- Conduit, cable tray, boxes and fittings
- Controls, relays, pushbuttons, fuses
- Copper and fiber data center infrastructure
- Electrified door hardware
- Enclosures, wireway, raceway
- Emergency telephones
- Fasteners, cable ties
- Fire systems
- Fuses, cutouts and safety devices
- HMI, power line controllers
- Insulators and arrestors
- Intrusion detection
- Lamps, lighting fixtures and controls
- Mass notification
- Mechanical door hardware
- Metering components, sockets and switches
- Molded rubber products and connectors
- MRO products
- Pads, pedestals and enclosures
- Poles, structures and substation connectors
- Smart grid solutions, metering and communications
- Sound, paging and intercom
- Switchgear, panel and switchboards, busway
- Terminals, wiring devices, connectors
- Transformers, power supplies
- Video surveillance
- Wire and cable

Our Supply Chain Solutions

Complex projects and programs put a strain on fixed costs, corporate assets and company resources and can impact your profitability and competitiveness in the marketplace. Anixter understands the challenges of getting a project done right, the first time. By leveraging our core competencies—including our customizable Supply Chain Solutions—we can help you identify the best processes for optimizing your supply chain, which can save you time, reduce costs, increase efficiencies and mitigate risk.

Supply Chain Security

- Assurance of supply
- Established deep supplier relationships
- Sourcing and procurement
- Material management
- Sourcing flexibility

Maximum ROI

- Minimize material-related job delays
- Faster cycle time to earnings
- Optimization of working capital
- Reduced material shrinkage, theft and loss
- Lower total cost of ownership

Streamlined Accountability

- One agreement to sign
- Single point of contact
- Coordinate material flow with project timeline
- Robust IT reporting capabilities

Flawless Execution

- Safety focused
- Complete project management
- Kitting solutions
- Contractor product flow
- B2B integration
- Site establishment through retirement
- Environmental stewardship
