

WESCO and Anixter's Slim-Spin reel is designed to simultaneously pull multiple cables for indoor applications. At only 32 inches wide, the Slim-Spin easily fits through standard 36-inch doorways. With four fixed-chamber reels and a single-chamber reel mounted on one pallet jack frame, standard load conductors can spin at the same rate on the four-chamber reel while smaller ground conductor can spin at its own rate on the single-chamber reel. The reels are delivered mounted on our custom-designed pallet reel caddies. Just roll into the pull position, raise the wheels and start pulling.

Return the Slim-Spin to WESCO and Anixter for reloading future pulls. Gain additional time and labor savings with pre-installed staggered pulling heads.

**FEATURES AND BENEFITS**

- Eliminates jack stands
- Easily transported
- Fits through 36" doorways
- Locks in place for pulling
- Reduces injury risk
- Reduces unproductive labor
- Cut to exact circuit length
- Just-in-time delivery

Copper		Load Conductor	Ground Wire
THHN	OD	Feet per Chamber	Feet per Chamber
8	0.23	4,871	4,175
6	0.25	4,123	3,534
4	0.33	2,366	2,028
3	0.36	1,988	1,704
2	0.39	1,694	1,452
1	0.45	1,272	1,091
1/0	0.50	1,031	833
2/0	0.54	884	757
3/0	0.60	716	613
4/0	0.66	592	507
250	0.72	497	426
300	0.77	435	372
350	0.83	374	321
400	0.87	340	292
500	0.96	280	240
600	1.06	229	197

Dimensions: 32 inches wide, 74 inches long, empty weight 577lbs.

## WESCO AND ANIXTER CONTRACTOR SERVICES

WESCO and Anixter offers electrical contractors a suite of cost-cutting solutions. These solutions are designed to:

- Reduce unproductive labor
- Minimize scrap and excess
- Mitigate risk
- Increase financial leverage.

### SOLUTIONS:

WESCO and Anixter's phase taping solution makes circuit identification easier at the job site.

WESCO and Anixter's pulling grip solutions eliminate on-site termination by having low voltage pulling eyes installed.

WESCO and Anixter's layering solution reduces the amount of reels required at the job site by layering multiple circuit lengths on the same reel.

SPEEDPULL bundles multiple, numbered circuit conductors to allow for a single pull.

PARAPULL<sup>SM</sup> eliminates waste and makes setup and pulls easy by using multiple chambers to load cable legs.

PARASPIN<sup>SM</sup> allows different diameters of cable to be pulled simultaneously by using independent spinning chambers.

PARAPLEX<sup>SM</sup> reduces the amount of reels at the job site by bundling of two or more cables paralleled on the same reel.

INSTA-REEL consists of a standard wooden reel that has oversized flanges attached to both sides and becomes a payout stand when chocked in place.

## WESCO and Anixter-Installed Pulling Eyes

Reduce unproductive labor by having WESCO and Anixter install pulling eyes onto each leg.

Eyes are installed in a clean and controlled environment.

- Reduces the need for on-site tooling
- Eliminates the need to order, receive, store and retrieve eyes
