

SPOTLIGHT ON VENDING SOLUTIONS

Anixter industrial vending solutions provide cost control through point-of-use access to supplies that can typically reduce consumption by at least 25%. Our solutions include procurement, delivery and installation of our automated inventory solutions within your facility. We offer a proven implementation methodology that includes custom solution configuration, onsite training and a menu of supply chain solutions that help you better manage the tools and materials within your business.

Customized solutions to fit your needs

- POU (Point-of-Use) industrial vending solutions
- RFID tool solutions
- Mobile inventory solutions
- Yard solutions

Turnkey approach – all we need is a “yes”

- Flexible value advantage models
- PMO team allocated to each project
- Anixter sourcing specialist
- Anixter VMI techs
- Implementation: regionally based inventory control subject matter experts
- A national team of trouble shooting technical experts

Our integrated supply chain solutions provide peace of mind, letting you rest assured that your employees have what they need, while keeping you in control. Contact us to automate your ordering, replenishment and distribution for consumable and durable items with Anixter's secure point-of-use inventory solutions.
