

## IMPROVE CASH FLOW AND LABOR EFFICIENCIES

WESCO | Anixter's Product Enhancement and Packaging programs, including camera configuration services, support your needs by saving time, reducing costs, increasing efficiencies, and mitigating risks for your business.

The faster you can deliver on customer orders, the more you can scale up your business, and while preparing an IP camera for installation is a necessary step, each task performed to prepare each camera carries additional costs in time, risk and money.

## CAMERA KITTING AND CONFIGURATION

WESCO | Anixter's camera configuration solutions can help you avoid early or unanticipated expenses while increasing your speed of service by delivering pre-configured, ready-to-install cameras, eliminating the need for configuration space, non-productive labor, early ordering, and storage at your facility. You'll realize a number of benefits using our camera kitting and configuration services:

- **Positively impact cash flow** when you won't need to buy cameras in bulk, far in advance of installation.
- **Eliminate budget strains and schedule delays** when you don't have missing parts, returns, or out-of-box failures.
- **Reduce unproductive labor** because cameras arrive ready for installation. Pre-configured and tested cameras can maximize your profitability and minimize margin erosion.
- **Tested in a clean, temperature-controlled environment** designed for IP addressing and testing.
- **Scalable** facilities designed to configure hundreds of units at one time, not one-by-one.
- **Just-in-time delivery** reduces your cash-to-cash cycle.

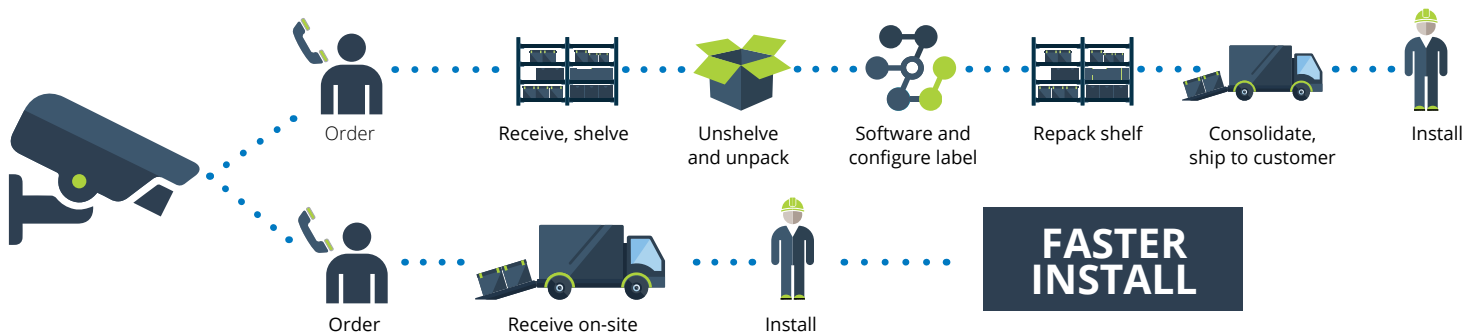

## COMMON CHALLENGES for contractors and integrators:

- Cash flow
- Speed to market and speed of installs
- Pressure on margins
- Operational costs

## SOLUTIONS FROM WESCO | ANIXTER Camera Configuration Services:

- **Faster installation:** unproductive labor is reduced when pre-configured cameras are installed for faster project completion.
- **Quality assurance:** reduce downtime and project delays with testing, configuration, and reporting capabilities.
- **Improved ordering, packaging, and deployment:** streamlined ordering using a single part number for cameras and applicable accessories. Components arrive in a consolidated kit, ready to deploy, eliminating excess packaging and increasing speed of deployment.

### Traditional Installation

### WESCO | Anixter Camera Kitting & Configuration

**AVAILABLE FOR EVERY CAMERA**

Camera configuration solutions are available for any camera from WESCO | Anixter's suppliers and can be customized to meet the requirements and installation conditions of your project.
