

Display Testing and Deployment Services

Product Enhancement and Packaging Programmes:
Service Highlight

Faster Installation, Simplified Logistics and Improved Cash Flow

Our Pro AV deployment services are designed to increase efficiencies on the job site. From equipment testing and kitting to wall mount installation and asset tagging, Wesco Anixter can help you complete projects faster.

Wesco Anixter's Product Enhancement and Packaging programs, including Display Testing and Deployment services, support the needs of integrators by saving time, reducing costs, increasing efficiencies and mitigating risk for your business.

Supply Chain Solutions Developed and Implemented Around Your Integration Needs

Project Preparation

- Forward provisioning to ensure every component is on-hand to meet preliminary ordering and deployment deadlines.

Testing and Configuration

- Pixel and DOA testing
- Video and audio input testing
- Display mounting plates and wall mount installation

Kitting and Consumables

- Specialty cable kits
- Consumables kits (zip-ties, booties, hook and loop wrap)

Deployment Preparation

- Development of install instructions
- Serial number capture
- Asset tagging
- Safe, secure, climate-controlled storage of sensitive and costly products
- Billing upon shipping/project completion

Available for Any Display

Display testing and deployment services can be provided on any display, available from any of Wesco Anixter's suppliers. Services can be customised to meet the requirements and installation conditions of your projects.

Benefits of Display Testing and Deployment Services:

Reduce unproductive labour and margin erosion

- Displays arrive ready for installation. No need to direct higher installation labour hours to configuration and testing, maximizing your profitability.

Minimise delays and downtime

- Faster, more efficient deployments, reducing time on site and associated overhead. Eliminates time associated with missing parts, returns and out-of-box failures.

Scalable

- Wesco Anixter facilities are designed to support large-scale deployments, capable of testing and storing hundreds of units at one time.

Positively impact cash flow

- Eliminates the need to buy displays in bulk, far in advance of installation.

Promote for leaner processes

- Eliminates touchpoints and excess material management.

Save space

- Decreases the need and cost of storage.

Reduce budget strains and schedule delays

- Eliminates the concern of missing parts, returns and out-of-box failures.

Just-in-time delivery

- Ship and bill to reduce cash-to-cash cycle.

Clean, controlled environments

- Services and storage conducted in dedicated, temperature-controlled space designed for IP addressing and testing.

From procurement to project management, fabrication and installation, Wesco Anixter can help you do more with less.

Wesco Anixter has expanded to bring you more of what you, our integrators, need to expand your offering and compete with the latest technologies. Beyond product, Wesco Anixter offers the partnership of trusted technical expertise, training resources and supply chain excellence to help meet the changing needs of your clients, tackle any size project with confidence, and scale your business.

Display Kitting for Large Deployment

Wesco Anixter's supply chain solutions help improve your time to market.

Forward provisioning and staging

Completion of pixel and DOA testing

Kitting and packaging of project consumables

Labelling, packing, preparation for deployment, and shipping to install site
