

Extended Distance Solutions for Parking Facilities

Expertise To Support Your Extended Distance Needs

Most parking facilities are detached from buildings making traditional network access unavailable. This distance along with the increasing size of parking facilities requires extended distance capabilities for your network. Wesco Anixter can help solve network problems with extended distance solutions that distribute connectivity and power to remote locations at the edges of parking facilities. Both hybrid cable and wireless solutions can provide a robust network infrastructure today while allowing for future capacity requirements.

Technology is a necessity for the infrastructure of your parking facilities, and it can be leveraged to transform the way people park. Our customer-centered approach to parking facilities provides solutions designed to ensure the security, safety and efficiencies that modern lots and structures require and drivers demand.

For more information on extended distance solutions for parking facilities, visit Wesco.com/parking-jamaica.

Ingenuity delivered.

Solutions Overview

Extended Distance Solutions

- IoT/IIoT solutions
- Network infrastructure
- Physical security
- Professional A/V
- Wireless

IoT/IIoT Solutions

- Analytics
- Lighting automation and control
- SaaS
- Sensors and monitoring
- Servers and gateways
- Utility Grade Infrastructure (UTG)

Network Infrastructure

- Building entrance protection
- Cable management and pathways
- Copper cabling
- Grounding and bonding
- Network switches and transceivers
- Optical fiber cabling
- PoE midspans and injectors
- Rack PDUs
- Racks and enclosures
- Ready. Set. Connect. pac
- Remote power solutions
- Uninterruptible power supply (UPS)

Physical Security

- Access control
- Biometrics
- Door locking hardware
- DVR, NVR and storage
- Emergency call stations
- Fire and life safety
- Intercoms, sound and paging
- Intrusion protection
- Pedestals and kiosks
- Video displays
- Video surveillance
- Grounding and bonding

Professional A/V

- Access control
- Biometrics
- Door locking hardware
- DVR, NVR and storage
- Emergency call stations
- Fire and life safety
- Intercoms, sound and paging
- Intrusion protection
- Pedestals and kiosks
- Video displays
- Video surveillance
- Grounding and bonding

Wireless Technologies

- Distributed antenna systems (DAS)
- Point-to-multipoint
- Point-to-point
- Wi-Fi
