

Energy Solutions for Parking Facilities

Expertise to Support Your Energy Solution Need

Sustainable energy solutions are a top priority for many organizations, but the opportunity for parking facilities as the venue for environmental stewardship is often overlooked. Solar power generation via panels and canopies integrated with parking facilities is an ideal environment for these solutions as land is repurposed without degrading the biological value.

A well-lit parking structure is a necessity for both safety and security. LED lighting provides lower power consumption while delivering intelligence and management capabilities beyond traditional lighting.

Electric vehicle (EV) charging stations support clean energy vehicles and green business initiatives by reducing carbon footprints, and can boost occupancy rates while attracting new clients and increasing revenue.

Energy Solutions

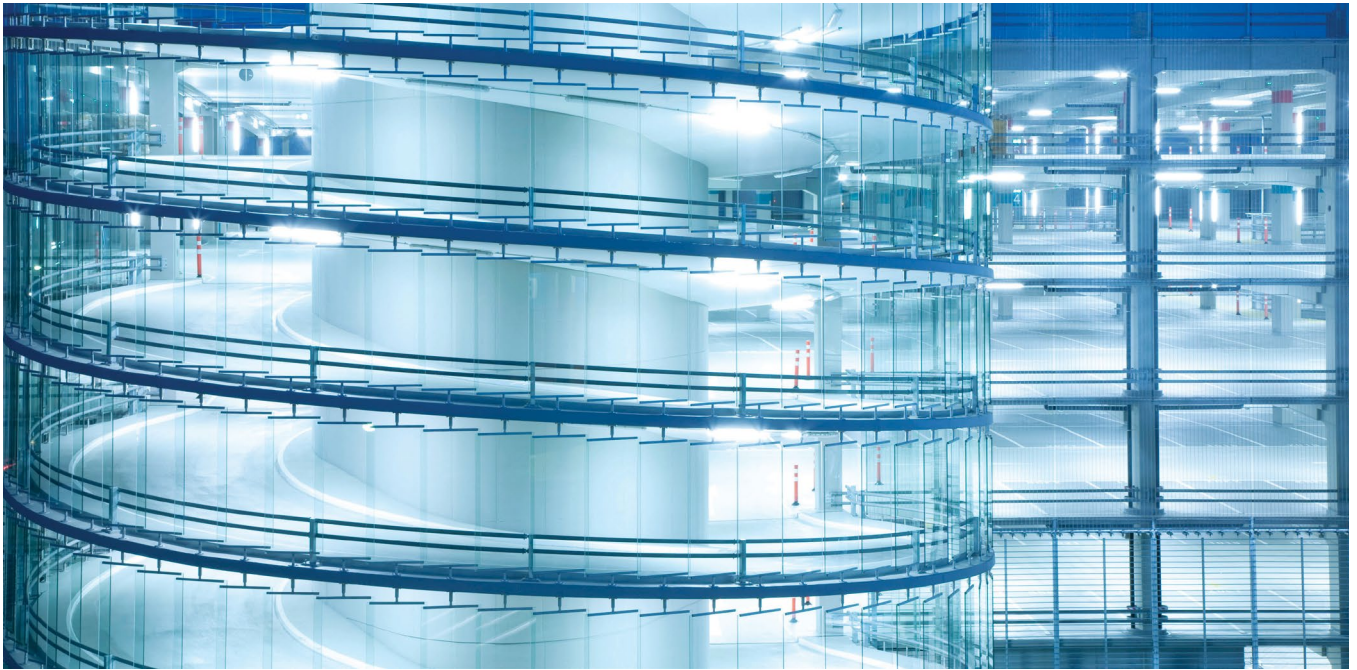

- Solar
- LED lighting
- EV charging

Technology is a necessity for parking facilities and infrastructure, and it can also be leveraged to transform the way people park. Our customer-centered approach ensures that our parking facilities solutions are designed to optimize the security, safety and efficiencies that modern lots and structures require and drivers demand.

Preferred Supplier Partners

Turnkey Solution

Wesco Anixter can provide a local, dedicated point of contact backed by a team of experts to assist with scope development, project management and operational execution. If you are looking for a complete turnkey solution, our team supports you from conception through installation.

We leverage an array of energy efficient solutions and tie them together to help you improve the security, safety and efficiencies of your parking facilities. Let Wesco Anixter help you achieve significant savings and create a smart, future-proof infrastructure.

Solutions Offerings

Solar

- Transformers
- Modules
- Racking
- Inverters
- Energy storage
- Wire and wire management

LED Lighting

- Lamps
- Ballasts
- Drivers
- Sensors
- Controls
- Poles
- Fixtures
- Network infrastructure

EV Charging

- Charging pedestals
- Switch gear
- Charger controller
- Breakers
- Wire and wire management
- Conduit and conduit fittings
- Grounding
- Mounting brackets
