

PRODUCT SOLUTIONS BRIEF
AMERISTAR

DATA CENTER RISK MANAGEMENT

Through our strong global partnerships and alliances with manufacturers such as Ameristar, an ASSA ABLOY group brand, we are able to present you with the following offering to meet your specific data center requirements.

Impasse II® Security Fence

Ameristar's Impasse II security fence offers the resistive strength of heavy-duty steel pickets secured vertically to a framework of specially formed rails and I-beam posts. The stylish design of the Impasse II, combined with its strength and security, provides a successful first line of defense.

What makes Impasse II security fence panels superior is its bracketless design, heavier posts and redesigned rail, that doubles as a secure raceway, which allows even easier integration with intrusion detection systems, closed circuit video and other surveillance and monitoring devices, making it perfect for a data center application.

Impasse II is the best choice for securing at risk facilities or protecting specific assets within a property.

CHALLENGE SOLVERS

- The unique shape of this product's rail enables its security fence designs to incorporate all forms of physical security protection and detection equipment into a single perimeter solution.
- The state-of-the-art polyester powder coating system provides all members of the Impasse family of fences with a finish that is far superior to other coatings in durability and scratch-resistance.
- The Impasse and Stalwart lines are the only fence and barrier products in the world to be certified under the SAFETY Act by the U.S. Department of Homeland Security.
- When combined with intrusion detection systems (IDS), proactive alerts caused by intruders attempting to either climb or break through the perimeter fence can be acted on quickly and decisively.

THE ANIXTER APPROACH

- **Perimeter defense**
 Establish a physical boundary at the property edge to deter external threats.

THE ASSA ABLOY SOLUTION

BUILDING ACCESS

Ameristar® Impasse II®
 Medeco³ security cylinders
 HID® EasyLobby®

ROOM ACCESS

HID multiCLASS SE® Readers
 Traka electronic key cabinets
 Corbin Russwin® locks

CABINET ACCESS

HES KS-100 wireless lock
 HES KS-200 wired lock
 Medeco X4 cylinders

WHAT WE HEAR

Challenges from various data center stakeholders:

PROTECTING the company's image

ACHIEVING regulatory compliance (HIPAA, PCI DSS, SOX, GLB)

BALANCING investment in both physical and logical security

STAYING one step ahead of adversaries with technology

EXECUTING policies and procedures specific to the data center

Infrastructure as a Platform
 by Anixter

Infrastructure as a Platform by Anixter provides a practical, configurable and integrated approach to deploying physical security infrastructure into your data center environment.

CONFIGURE

We help you discover and map your specific needs to the best solution.

- Steel picket design
- Privacy screening option
- Anti-scale option
- Hardened option

BUNDLE

Your validated, preconfigured solutions are packaged and site ready.

- Anti-ram barrier
- Sliding gates
- Electronic gate locks
- IP cameras

DEPLOY

Controlled, repeatable solutions are delivered on time and under budget.

- Custom packaging and labeling
- Time-sensitive delivery options
- Staged project shipping
- Tailored last-mile delivery

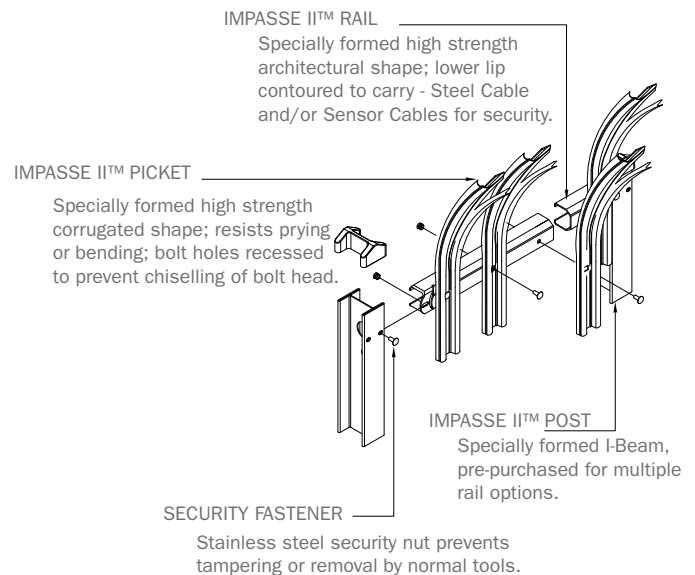

AMERISTAR IMPASSE II SECURITY FENCE FEATURES

✓ UNPARALLELED PERIMETER SECURITY PROTECTION

- Three picket styles available
- Anti-scale option to deter assailants from climbing
- Manufactured using high-tensile pregalvanized G-90 steel
- Anti-ram barrier available for added protection

✓ DEPLOY QUICKLY AND STAY AHEAD OF ADVERSARIES

- Bracketless design for installation in less time for less cost
- Swinging and sliding gates help provide a simplistic solution for gaining access
- Optional intrusion detection systems available to add remote monitoring and alerting
- 15-year warranty

Impasse II pickets and posts are manufactured using high-tensile pre-galvanized G-90 steel.
