

PRODUCT SOLUTIONS BRIEF
CANON

DATA CENTRE RISK MANAGEMENT

Layer 1: Perimeter Defence

Layer 2: Clear Zone

Through our strong global partnerships and alliances with manufacturers such as Canon, we are able to present you with the following offering to meet your specific data centre requirements.

VB-R11VE PTZ Network Camera

Canon's R11VE PTZ network camera is ideal for demanding outdoor applications. Featuring 1.3 MP continuous 30x zoom, the R11 offers fast and accurate monitoring and excellent tracking in both low-light and harsh environmental conditions, which makes it ideal for a data centre's perimeter and clear zone.

Keep every outdoor angle covered with Canon's R11VE network camera

CHALLENGE SOLVERS

- Camera intelligence, such as intruder detection, identifies moving objects of specified size entering an out-of-bounds area and will alert operators and automatically activate recording.
- Continuous 360° panning and Auto-Flip lets operators keep subjects in view without changing their handling perspective, while intelligent Auto-Tracking allows them to attain and track their target virtually hands-free.
- The bright IR Corrected and wide f/1.4-4.6 aperture High UD lens provides clean sharp images day or night and offers improved low light performance. Image enhancing Haze Compensation automatically adjusts image contrast to make environments with fog, haze or smog easier to see.

THE ANIXTER APPROACH

Six Layers of Physical Security

- **Perimeter defence**
Establish a physical boundary at the property edge to deter external threats.
- **Clear zone**
Create a buffer zone between the perimeter and the facility to better detect physical intrusion.

WHAT WE HEAR

Challenges from various data centre stakeholders:

PROTECTING the company's image

ACHIEVING regulatory compliance (HIPAA, PCI DSS, SOX, GLB)

BALANCING investment in both physical and logical security

STAYING one step ahead of adversaries with technology

EXECUTING policies and procedures specific to the data centre

Infrastructure as a Platform
by Anixter

Infrastructure as a Platform by Anixter provides a practical, configurable and integrated approach to deploying physical security infrastructure into your data centre environment.

CONFIGURE

We help you discover and map your specific needs to the best solution.

- Resolution
- Frame rate
- Range of motion
- System integration

BUNDLE

Your validated, preconfigured solutions are packaged and site ready.

- Mounting kits
- Media converters
- Power adapters
- Video management software

DEPLOY

Controlled, repeatable solutions are delivered on time and under budget.

- Custom packaging and labelling
- Time-sensitive delivery options
- Staged project shipping
- Tailored last-mile delivery

CANON R11VE CAMERA FEATURES

✓ PREVENT UNAUTHORISED ACCESS

- Automated patrolling
- Sound detection
- Conditional alarms
- Follow subjects hands-free
- Video content analysis

✓ OPTIMISED FOR OUTDOOR ENVIRONMENTS

- Certified vandal-proof protection
- Removable IR filter
- Extreme low-temperature operation
- Superb low-light performance
- Extended weatherproofing

The R11VE is available in an indoor version, the R11. Pictured with a recessed mount kit.
