

# PRODUCT SOLUTIONS BRIEF COMMSCOPE

## DATA CENTRE NETWORK MIGRATION

Through our strong global partnerships and alliances with manufacturers such as CommScope, we are able to present you with the following offering to meet your specific data centre requirements.

### CommScope Micro Data Centre Solutions

CommScope solutions for micro data centres combine the Ethernet performance of GigaSPEED® copper cabling, the preterminated copper solution of InstaPATCH® Cu and the imVision® AIM standards-compliant intelligent solution. Customers are able to choose from the broadest portfolio of products available on the market designed specifically for the data centre, to help deliver solutions that integrate seamlessly with existing network environments, robust and error free, whilst controlling every aspect of your infrastructure in real time.

### CHALLENGE SOLVERS

- GigaSPEED X10D provides unprecedented performance for key parameters, such as insertion loss and all forms of crosstalk, both within and between channels, yielding improved bandwidth, data throughput and network efficiency. The Optimised Material Technology (OMT) platform reduces cable diameter while optimising transmission performance.
- InstaPATCH Cu preterminated copper solutions represent a major advance for the fast deployment of high-performance networks. These solutions are factory-connected, factory-tested, modular connectivity systems. Designed for high-density environments such as data centres, InstaPATCH Cu solutions are ideal for rapid deployment and high performance. Their modular design supports improved cable management and scalable capacity.
- imVision is a sophisticated approach to managing the complex infrastructure cabling and connectivity that provides the foundation for connected and efficient building technologies. It combines intelligent hardware and software to provide users with unprecedented real-time visibility and control over their physical layer, resulting in better capacity management of ports and cabling, higher availability, reduced mean-time-to-recovery, automated change management and faster time to value when deploying new IT assets.

### THE ANIXTER APPROACH

- **Network flexibility**  
Apply designs to accommodate your performance requirements and highly scalable network architecture demands.
- **Cabling topology**  
Determine the right choice for your computing requirements with careful consideration for end-of-row (EoR), middle-of-row (MoR), top-of-rack (ToR) or centralised cabling structures.
- **Media selection**  
Choose the appropriate cabling media from twisted pair, optical fibre and direct attached to address high-speed bandwidth requirements.
- **Density demands**  
Deploy scalable designs that accommodate for uncertain density requirements.

### THE COMMSCOPE SOLUTION

#### GIGASPEED

X10D U/UTP  
X10D F/UTP  
XL U/UTP

#### INSTAPATCH CU

InstaPATCH OneLink  
Patch panel modules  
Outlets and modular plugs

#### IMVISION

Software  
Hardware options  
Service options

CommScope's solutions support the next generation of data centres.

### WHAT WE HEAR

Challenges from various data centre stakeholders:

**AMORTISATION** of cabling investment

Infrastructure **COMPLEXITY**

Restrictions of **LEGACY SYSTEMS**

**SPEED** of deployment

Pace of **INNOVATION**, adoption

**Infrastructure as a Platform**  
by Anixter

Infrastructure as a Platform by Anixter offers a standards-based, physical layer approach that provides a foundation to meet the high-performance computing demands of your data centre.

## CONFIGURE

We help you discover and map your specific needs to the best solution.

- Capacity needs
- Panel and cable type
- Monitoring requirements
- Cable assemblies

## BUNDLE

Your validated, preconfigured solutions are packaged and site ready.

- Network infrastructure
- Racks and cabinets
- Management software
- Physical security solutions

## DEPLOY

Controlled, repeatable solutions are delivered on time and under budget.

- Custom packaging and labelling
- Time-sensitive delivery options
- Staged project shipping
- Tailored last-mile delivery

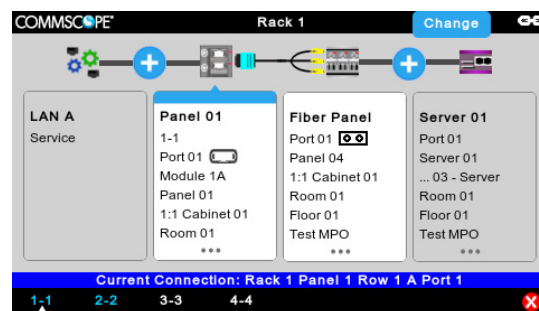

## COMMSCOPE DATA CENTER FEATURES

### ✓ SCALABLE, FLEXIBLE NETWORK

- GigaSPEED delivers next generation support by providing bandwidth that is extended out to 500 MHz with guaranteed alien crosstalk performance.
- InstaPATCH Cu offers multiple options for a variety of copper environments.
- GigaSPEED is specifically engineered with enhanced cable and connector performance to support Ethernet requirements.

### ✓ SIMPLIFIED MANAGEMENT

- InstaPATCH Cu is engineered for cleaner, more convenient installation. Copper cable assemblies can be installed in a fraction of the time of traditional implementation.
- imVision reduces time-intensive manual processes, generates electronic work orders and enables guided administration of connectivity changes.
- imVision features end-to-end circuit visibility, which means that in the event of a network failure a root cause analysis can quickly be established and service quickly restored.

CommScope's imVision System Manager software gives you the power to plan, implement and document changes to your network infrastructure remotely through a standard web browser.

**About Anixter:** [anixter.com/aboutus/emea](http://anixter.com/aboutus/emea)  
**Legal Statement:** [anixter.com/legalstatement](http://anixter.com/legalstatement)

At Anixter, we enable the connected world. By building, connecting, protecting and powering valuable assets and critical infrastructures, we help to sustain and grow businesses and communities worldwide. We accomplish this by offering full-line solutions, technical intelligence, supply chain expertise and an unmatched global distribution network.
