

# PRODUCT SOLUTIONS BRIEF GEIST

## DATA CENTRE INFRASTRUCTURE MANAGEMENT

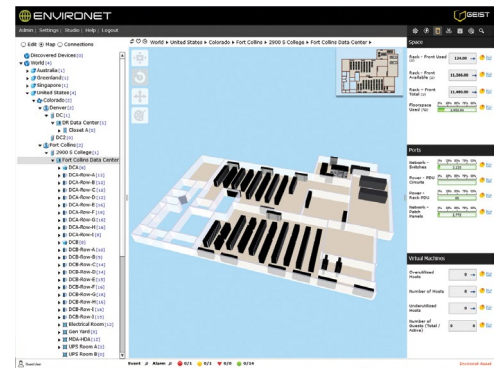

Through our strong global partnerships and alliances with manufacturers such as Geist, we are able to present you with the following offering to meet your specific data centre requirements.

### Environet Asset

Geist's Environet Asset simplifies the process of visualisation and management of both the logical and physical data centre infrastructure. Providing users with the information needed to effectively manage assets, networks, power and space ranks high on Geist's DCIM solutions.

Environet Asset's enterprise visualisations provide easy navigation throughout the data centre, from the site level down to each individual connection. Its drag-and-drop functionality makes connection mapping simple. The Environet Asset solution understands where available capacity exists and utilises work orders to effectively manage the entire asset lifecycle.

Visualisation and management of both the logical and physical data centre infrastructure

### CHALLENGE SOLVERS

- It quickly visualise critical power, connection and space data at the rack. Asset drag-and-drop functionality makes placing assets in the rack simple.
- Gain important rack details from a graphical user interface. Information on each aspect of the data centre is displayed in a comprehensive view.
- User-configurable 3D modelling, rack building and port mapping is available for both power and network connections.
- Users can create plans for future changes to the data centre. Each plan can be configured by using work orders to make sure each step of the implementation goes smoothly.

### THE ANIXTER APPROACH

Five Senses of DCIM

- **Asset management**  
Implement a centralised asset management process with an easily maintainable database.
- **Change management**  
Integrate move, add and change activity with existing work order systems to automate the workflow process.
- **Capacity planning**  
Use DCIM data to accurately forecast available power, cooling, network connectivity and space.

### THE GEIST SOLUTION

INTELLIGENT HARDWARE	SOFTWARE OPTIONS	SERVICE OPTIONS
PDU's Sensors	Licensing Maintenance	Installation Configuration Integration

### WHAT WE HEAR

Challenges from various data centre stakeholders:

**INTEGRATING** with business process

No technology **EVALUATION** tools

Supplier **INTEGRATION** competency

Interdepartmental **CONFLICT**

Cost of **IMPLEMENTATION**

**Infrastructure as a Platform**  
by Anixter

Infrastructure as a Platform by Anixter provides an investigative methodology that uncovers gaps in your data centre infrastructure management strategy and helps you reclaim stranded capacity.

## CONFIGURE

We help you discover and map your specific needs to the best solution.

- Licencing and maintenance
- Installation services
- Configuration services
- Integration and education services

## BUNDLE

Your validated, preconfigured solutions are packaged and site ready.

- Intelligent cabinet PDUs
- Climate monitors and sensors
- Racks and cabinets
- Dynamic containment

## DEPLOY

Controlled, repeatable solutions are delivered on time and under budget.

- Custom packaging and labelling
- Time-sensitive delivery options
- Staged project shipping
- Tailored last-mile delivery

## ASSET MANAGEMENT

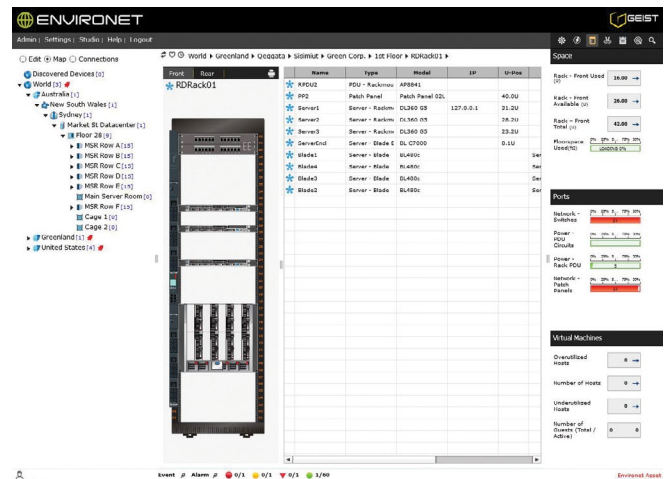

- Visualises critical power and network connections
- Displays valuable VM information in a clear, effective manner
- Manages essential information on all stages of your devices' lifecycle

## CHANGE MANAGEMENT

- Provides work order management from creation to approval to implementation
- Plans for future changes
- Improves operational awareness

## CAPACITY PLANNING

- Forecasts critical power, connection and space availability
- Knows where you have available power and cooling
- Automates asset placement based on available capacity

Environet Asset's drag-and-drop functionality makes connecting devices simple.

**About Anixter:** [anixter.com/aboutus](http://anixter.com/aboutus)  
**Legal Statement:** [anixter.com/legalstatement](http://anixter.com/legalstatement)

At Anixter, we enable the connected world. By building, connecting, protecting and powering valuable assets and critical infrastructures, we help to sustain and grow businesses and communities worldwide. We accomplish this by offering full-line solutions, technical intelligence, supply chain expertise and an unmatched global distribution network.
