

PRODUCT SOLUTIONS BRIEF
MILESTONE

DATA CENTRE RISK MANAGEMENT

Through our strong global partnerships and alliances with manufacturers such as Milestone, we are able to present you with the following offering to meet your specific data centre requirements.

XProtect® Software Suite

Milestone's XProtect is designed with open architecture. This means that all XProtect products are compatible with more IP cameras, encoders and digital video recorders than any other VMS manufacturer's products, giving you the freedom to mix and match hardware to fit your needs and budget.

CHALLENGE SOLVERS

- Automate different aspects of the security system based on events or time schedules.
- Cameras are optimised based on internal/external events or time schedules.
- Email notification is based on system or security events.
- Multisite deployments using different security systems
 - The management interface provides a wide range of administration tools.
 - Device group management provides fast and structured management of cameras and other connected devices in large installations.
- Locating specific incidents in video recordings
 - Smart Search helps users find video sequences quickly and accurately.
 - Bookmarking allows users to flag video sequences of particular interest and add descriptive notes.

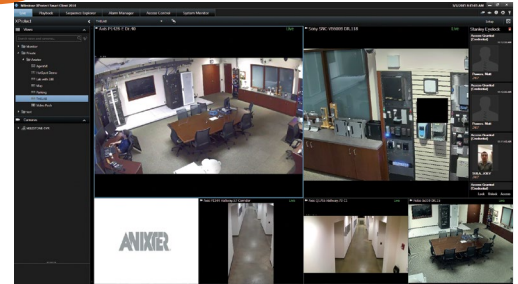

THE ANIXTER APPROACH

Six Layers of Physical Security – XProtect addresses the following layers:

- | | |
|---|---|
| <ul style="list-style-type: none"> • Perimeter defense
Establish a physical boundary at the property edge to deter external threats. • Clear zone
Create a buffer zone between the perimeter and the facility to better detect physical intrusion. • Reception area
Control visitors to the facility and validate authorised access to the data centre. | <ul style="list-style-type: none"> • Service corridor
Monitor the internal passages to defend against unauthorised mobility within restricted areas. • Data room
Implement high-security electronics to prevent general personnel or intruders from accessing sensitive areas. • Data cabinet
Establish protection of the sensitive electronics that contain critical data. |
|---|---|

THE MILESTONE SOLUTION

XPROTECT PROFESSIONAL+	XPROTECT EXPERT	XPROTECT CORPORATE
For mid-sized installations - Unrestricted number of cameras - Multi-site, multi-server - Scalable	For uninterrupted video recording - Redundancy on recordings with Edge Storage	For mission critical, 24/7 security - Distributed surveillance operations

XProtect® video management software (VMS) is powerful and easy to use.

WHAT WE HEAR

Challenges from various data centre stakeholders:

- PROTECTING** the company's image
- ACHIEVING** regulatory compliance (HIPAA, PCI DSS, SOX, GLB)
- BALANCING** investment in both physical and logical security
- STAYING** one step ahead of adversaries with technology

- EXECUTING** policies and procedures specific to the data centre

Infrastructure as a Platform
by Anixter

anixter.com/shopmilestone/apac

Infrastructure as a Platform by Anixter provides a practical, configurable and integrated approach to deploying physical security infrastructure into your data centre environment.

CONFIGURE

We help you discover and map your specific needs to the best solution.

- Type of deployment
- Number of cameras
- Number of servers
- Number of users

BUNDLE

Your validated, preconfigured solutions are packaged and site ready.

- Axis network cameras
- Axis video control board
- Milestone Husky™ NVR
- Category 6 U/UTP cable

DEPLOY

Controlled, repeatable solutions are delivered on time and under budget.

- Custom packaging and labelling
- Time-sensitive delivery options
- Staged project shipping
- Tailored last-mile delivery

XPROTECT SOFTWARE SUITE FEATURES

✓ XPROTECT PROFESSIONAL

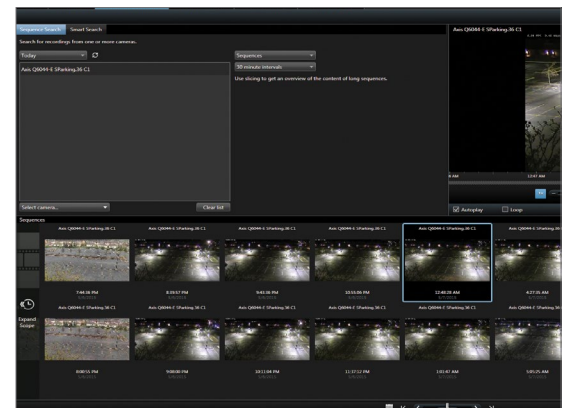

- Three viewing clients allow users to quickly identify issues and respond to incidents.
- Built-in motion detection allows cameras to record when they detect specific motions.
- Full alarm management gives consolidated overview of security and system alarms for immediate visual verification

✓ XPROTECT EXPERT

- Unlimited system scalability
- Automate tasks and control systems
- Flag video sequences of particular interest and add descriptive notes

✓ XPROTECT CORPORATE

- Centralised single management interface
- Video database encryption and digital signing
- Smart Search and Sequence Explorer allow users to quickly sort through large amounts of evidence

Full flexibility to add additional recording servers and expand the system
