

PRODUCT SOLUTIONS BRIEF
AUSTIN HUGHES

COMMERCIAL BUILDING SPACE UTILISATION

Through our strong global partnerships and alliances with manufacturers such as Austin Hughes, we are able to present you with the following offering to meet your specific commercial building requirements.

InfraPower® Intelligent PDU

Austin Hughes' InfraPower Intelligent PDUs are quality, rack-mountable power distribution and monitoring solutions designed to help manage power capacity, reduce downtime, reduce energy costs and improve efficiency.

InfraPower locally metered, remotely monitored and switched rack PDUs are designed for use across the network, either locally via SNMP or over IP.

W series PDUs are designed to support daisy chain configurations.

CHALLENGE SOLVERS

- 3 inch colour LCD display with optional touch screen functionality: The sharp and highly visible display provides local data of current (A), voltage (V), power (kW), energy consumption (kWh) and power factor of the entire PDU.
- Latching relay (WS and WSi models): To protect mission-critical equipment from unplanned downtime, socket switching is controlled via bistable/latching relays making sure there is an “always on” operational performance and socket status returning to a prepower outage after a planned or unplanned shutdown.
- Multiple outlet configurations: W Series PDUs are available with multiple outlet configurations per each individual PDU.
- SNMP hot pluggable IP dongle provides IP remote access to the PDUs using a single IP address chain.

THE ANIXTER APPROACH

- **Electrical Facilities**
 Monitor room-by-room electricity consumption and performance with intelligent power solutions.

THE AUSTIN HUGHES SOLUTION

| PDU TYPE | MONITORING TYPE | ACCESSORY OPTIONS |
|---|---------------------------|--------------------------------|
| Basic Metered Monitored Switched | Local Remote Outlet | IP dongle Sensors Colour |

WHAT WE HEAR

Challenges from the various commercial building stakeholders are:

ADAPTING to a changing workforce

Growing **COST** of real estate

Rising **ENERGY** costs

Offering **FUNCTIONAL MEETING** environments

Meeting staff **COMFORT REQUIREMENTS**

Infrastructure as a Platform
 by Anixter

Infrastructure as a Platform by Anixter provides a practical, configurable and integrated approach to optimise real estate effectiveness in your commercial building.

CONFIGURE

We help you discover and map your specific needs to the best solution.

- PDU type
- Number and type of outlets
- Input cord and receptacle type
- Colour casing

BUNDLE

Your validated, preconfigured solutions are packaged and site ready.

- Cabinet and racks
- IP dongle
- Environmental sensors
- Coloured power cords

DEPLOY

Controlled, repeatable solutions are delivered on time and under budget.

- Custom packaging and labelling
- Time-sensitive delivery options
- Staged project shipping
- Tailored last-mile delivery

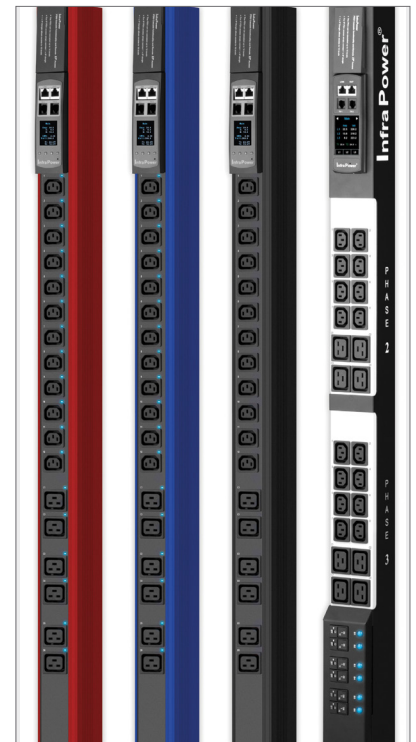

AUSTIN HUGHES INFRAPOWER FEATURES

✓ MONITOR POWER CAPACITY

- Centralised management for up to 480 PDUs
- Remote management via free browser-based management software for up to 720 PDUs
- Two environmental plug-in ports for temperature and humidity monitoring
- Manage up to 16 PDUs from one address using one network switch port via cascading

✓ PREVENT AND MITIGATE OUTAGES

- 3 inch LCD display is powered by a field replicable DC module to avoid unnecessary downtime
- PDU data has a metering accuracy to within +/- 1 percent
- Coloured PDU casings allow differentiation of power feeds
- SNMP hot pluggable IP dongle provides remote access using a single IP address

Colour casings and cords for visualising power sources

About Anixter: anixter.com/aboutus
Legal Statement: anixter.com/legalstatement

At Anixter, we enable the connected world. By building, connecting, protecting and powering valuable assets and critical infrastructures, we help to sustain and grow businesses and communities worldwide. We accomplish this by offering full-line solutions, technical intelligence, supply chain expertise and an unmatched global distribution network.
