

COMMERCIAL BUILDING SPACE UTILISATION

Through our strong global partnerships and alliances with manufacturers such as Chatsworth Products (CPI), we are able to present you with the following offering to meet your specific commercial building requirements.

eConnect® PDUs

CPI's eConnect Power Distribution Units (PDUs) provide the ultimate solution for cabinet power distribution in the evolving enterprise. With innovative capabilities such as Secure Array™ IP Consolidation, eConnect PDUs offer the quickest and lowest cost deployment among all intelligent rack PDU solutions in the industry. Additionally, high ambient temperature ratings, patent-pending Click Secure locking outlets and solutions that support up to 100 amps CPI's eConnect PDUs make the ideal solution for any commercial building environment.

Features such as Click Secure and a high ambient temperature rating make CPI's eConnect PDUs the ideal solution for any IT environment.

CHALLENGE SOLVERS

- Secure Array IP Consolidation reduces costs and decreases installation time by allowing you to link up to 32 PDUs under a single IP address by using standard Ethernet cables.
- Optimised for use in ambient air temperatures up to 149°F (65°C) at the input power rating (kW), it features a low-profile design that does not block airflow.
- To reduce the risk of unplanned outages, Click Secure Technology adds IEC locking outlets which securely fasten equipment to the PDU without the need for proprietary power cords.
- The continuous monitoring of voltage, current, power, power factor, line input and alarm notifications provide precise customer and equipment PDU usage.

WHAT WE HEAR

Challenges from the various commercial building stakeholders are:

ADAPTING to a changing workforce

Growing **COST** of real estate

Rising **ENERGY** costs

Offering **FUNCTIONAL MEETING** environments

Meeting staff **COMFORT REQUIREMENTS**

Infrastructure as a Platform
by Anixter

Infrastructure as a Platform by Anixter provides a practical, configurable and integrated approach to optimise real estate effectiveness in your commercial building.

CONFIGURE

We help you discover and map your specific needs to the best solution.

- Five levels of functionality
- Single- and three-phase solutions
- Vertical and horizontal options
- Outlet type and quantity

BUNDLE

Your validated, preconfigured solutions are packaged and site ready.

- Remote infrastructure management (RIM)
- CPI cabinet systems
- CPI rack systems
- Temperature and humidity sensors

DEPLOY

Controlled, repeatable solutions are delivered on time and under budget.

- Custom packaging and labelling
- Time-sensitive delivery options
- Staged project shipping
- Tailored last-mile delivery

CPI ECONNECT PDU FEATURES

✓ REDUCE ENERGY COSTS

- Vertical PDUs have a low-profile design that does not block airflow.
- ±1 percent power metering improves accuracy.
- Optional outlet metering provides visibility at the IT equipment level.
- It is compatible with many DCIM software packages, which accept SNMP v1, v2 and v3 traps.

✓ ADAPT TO A CHANGING WORKFORCE

- Network connection can be accessed remotely to monitor and control power usage.
- PDUs come in more than 40 standard configurations.
- Short lead times provide the ability to quickly create customised options and offer flexibility.
- The system is adaptable for present and future needs.

Universal tool-less mounting makes installation of CPI's eConnect PDUs simple.
