

SOLUTIONS Linecard

SUPPLY CHAIN SERVICES

Reducing costs, saving time, improving productivity and mitigating risks – it's our goal on every project. With our customizable Supply Chain Solutions, you can eliminate costs, address sustainability requirements, enhance focus on your core competencies and stay competitive in the marketplace.

Anixter's Supply Chain Model

Anixter's supply chain model includes five key core competencies that must be addressed when building an effective solution. We continually invest in people and processes to meet your complete supply chain needs.

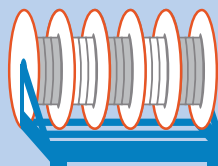

SAVE TIME

REDUCE COSTS

INCREASE EFFICIENCY

MITIGATE RISK

Sourcing

Anixter's manufacturer relationships and knowledge of not only the products but also your applications help you reduce the amount of time and resources required for sourcing products.

- Product specification review
- Supplier management
- In-country sourcing
- Part number consolidation
- Leverage spend
- Copper price risk mitigation (futures)

Inventory Management

Anixter can help reduce risks and costs by leveraging our facilities, managing inventory levels and anticipating lead times for you.

- Forward provisioning of inventory in region
- Inventory management and visibility
- Vendor managed inventory (VMI)
- Cable management
- Standard operating procedures
- Warehouse network
- Inventory provisioning
- Reduction of scrap and overruns
- Cable yard reel tracking tool

Product Enhancement & Packaging

Anixter can help you find ways to reduce time, effort and costs by packaging products that streamline the implementation process so you can more efficiently deliver your projects.

- Preassembly
- Kitting
- Customized labeling
- Special packaging
- Asset tagging
- Product DOA checks
- IP addressing, MAC address
- Product configuration
- Construction deployment services (PARASPIN, PARAPULL, PARAPLEX, SPEEDPULL)

Global Logistics

Anixter's global operations experience enables us to work with you to determine the most efficient methods for delivering products to help mitigate the risk of project delays.

- Lead time management
- VAT, duties, taxes and import cost optimization
- Freight consolidation
- Inbound transit time management
- Just-in-time delivery
- Import/export documentation

eCommerce

Anixter systems provide real time visibility into inventory and can be integrated for faster transaction processing and increased operational efficiencies.

- eAnixter contract pricing & order management
- e4u online order management & workflow
- eDelivery services: email invoices and statements
- EDI
- B2B
- Online ordering
- Punchout or Roundtrip Catalogs
- Custom content catalog
- Custom invoicing
