“As specialists in our end markets, we apply laser focus to streamlining the supply chain and achieving the lowest total cost of ownership for our customers.”

Bill Galvin, President & CEO

Who We Are

Anixter is a leading global distributor of communications and security products and electrical and electronic wire and cable. We help our customers specify solutions and make informed purchasing decisions around technology, applications and relevant standards. Throughout the world, we provide innovative supply chain management solutions to reduce our customers' total cost of production and implementation.

Case Study: EPC Needs to Meet Benchmarks

A global engineering, consulting and construction company needed to partner with a supplier that could meet their budgetary, construction and commissioning benchmarks. The company turned to Anixter for expertise, and we recommended Anixter's Deployment Services for their projects.

Completing Projects on Time: Anixter's Deployment Services

With Anixter's Deployment Services, Anixter purchases the cable, stores it at a local facility and cuts it according to length prior to shipment. Anixter also labels, tags and prepares shipments as directed by the customer project management team.

Saving Time with Service

Over the course of five months, Anixter deployed 148 reels to the job site and delivered significant savings to the EPC customer:

- Reduced setup time versus prespooling at the site and setting up wooden reel trees
- Allowed the customer to freeze the unit price of the power and control cable for the duration of the contract up to the pounds of copper ordered in the original BOM
- Staged the cable in Anixter's warehouse, which limited the cable theft exposure on site
- Billed for cable only after it was delivered to the job site, which allowed for the deferred billing of the cable cost and an improved cash flow position for the customer
- Reduced cable waste
- Realized savings in on-site labor, equipment and storage
